Platform

- 100s of integrations
- Open & extensible open platform

Partners

- 100% channel friendly
- MSSP and cloud ready

Community

1000s of members (largest in the industry)

The **Operating System** for Enterprise Security

Accelerate Response

Respond to incidents with speed and scale

100s of integrations

1000s of security actions

Cross-correlations

Standardize Process

Respond to incidents the same way every time

Task-based workflows

Visual playbook editor

SLA and metric tracking

Collaborate and Learn

Improve investigation quality by working together

Virtual war room

Investigation canvas

Machine learning

Reduce Risk

Reduce business and security risk

Dashboards and reports

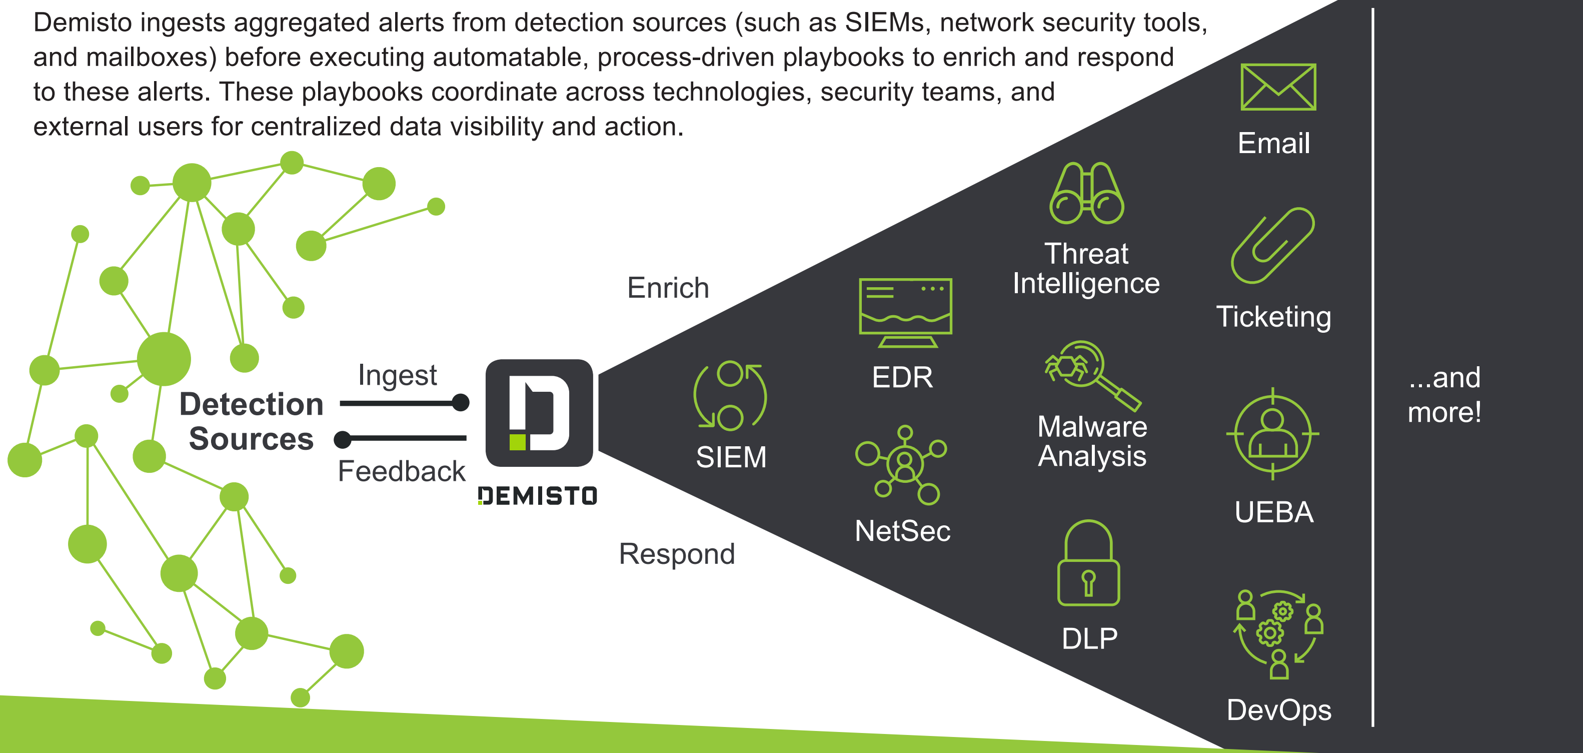
Auto documentation

Improved ROI

DEMISTO

How Demisto Works

Demisto ingests aggregated alerts from detection sources (such as SIEMs, network security tools, and mailboxes) before executing automatable, process-driven playbooks to enrich and respond to these alerts. These playbooks coordinate across technologies, security teams, and external users for centralized data visibility and action.



How Demisto Helps

Improve Investigation Quality

Use collaborative workspace, machine learning, and cross-correlations

Automate Repeatable Steps

Automate actions to standardize and scale incident response

Unify Security Functions

Gather intelligence from multiple products on a single console
