OWASP Compliance Dashboard	✓	✗
Granular Policies for micros-services and APIs	✓	✗
Guided Configuration	✓	✗

# Migration options

# No-cost migration to Advanced WAF

## Advanced WAF

### NO COST MIGRATION

- Delivers **sophisticated controls** to mitigate automated app attacks and vulnerabilities, and detects attacks using ML.
- Inspection, scripting, and protection against the OWASP Top 10,
- Proactive bot defense (including Mobile SDK)
- App layer DoS protection,
- Defense against targeted threat campaigns, and specific fine-grained controls for API security.

### Requirements:

- ASM and Best-Bundle customers using v14.1. or above and have a valid service agreement in place are eligible for this no-charge migration to Advanced WAF
- There is also no increase in the service renewal pricing
- Migrated customers are eligible to purchase add-ons (ex. Threat Campaigns, Leaked Credential Check, and Anti-bot mobile SDK)

# Other migration options

## NGINX App Protect

- lightweight stand-alone security solution for cloud and containers
- Self-managed
- Can be easily scaled out automatically
- Simple integration into CI/CD tool chain

## Essential App Protect

- Instant, out-of-the-box protection from common web exploits, malicious IPs and coordinated attack types
- Simple cloud-based application protection across any cloud, anywhere
- Provision and deploy in minutes or automate everything with APIs.

## Silverline Managed WAF

- Provides the advanced app security controls of Advanced WAF **as fully managed service.**
- Silverline also utilizes F5 ASM and Adv. WAF, therefore, current ASM security policies can be easily migrated to Silverline.

Thank you!
