

YOUR QUICK GUIDE TO EXCLUSIVE NETWORKS VENDORS THAT MEET YOUR CUSTOMERS BUSINESS NEEDS

Exclusive Networks Denmark A/S, Strandvejen 58, 4th floor, 2900 Hellerup
+45 70 234 235 | www.exclusive-networks.com/dk

WELCOME TO EXCLUSIVE NETWORKS DENMARK

We Are Exclusive Networks.
The global trusted digital infrastructure specialist distributor driving the transition to a totally trusted digital world for all people and organisations.

Please find following the majority of the vendors we represent in Denmark and learn about their outstanding solutions within Cyber Security and Cloud Solutions. You can read more about each vendor by following the links “Read more” under each vendor. Feel free any time to contact us for further information.

ARISTA

ARISTA NETWORKS THE CLOUD NETWORKING DECADE.

Arista EOS, is the most advanced network operating system to enable open third party development.

ARISTA

Arista Networks is an industry leader in cognitive cloud networking for mission-critical data center and campus environments.

Arista's award-winning platforms deliver availability, agility, automation analytics and security through CloudVision® and Arista EOS®, an advanced network operating system. Committed to open standards, our platforms range in speeds from 10-400 gigabits per second.

At the core of Arista's platform is the Extensible Operating System (EOS™), a ground-breaking network operating system with single-image consistency across hardware platforms, and modern core architecture enabling in-service upgrades and application extensibility.

Arista's new CloudVision as-a-Service product is now available as a fully managed software service that automates multi-domain networks spanning across the client to cloud to help customers achieve faster time-to-value, elastic scaling, and continuous network assurance.

THE TEAM SOLVING THE LEAST SEXY PROBLEM IN CYBERSECURITY: ASSET MANAGEMENT.

Never question where your assets are or how they're secured again.

AXONIUS

It's 2020, and security teams are still spending time and manual effort trying to understand the assets they have, whether those assets are secure, and whether they adhere to or deviate from their security policies.

Our mission is to give customers a comprehensive and always up-to-date asset inventory, uncover security gaps, and automate as much of the manual remediation work as our customers want. When organizations stop spending time on manual asset management tasks, they're able to take on the high-value cybersecurity initiatives that highly trained and skilled cybersecurity professionals love doing.

- Get a complete asset inventory of your environment
- Integrations to +280 sources of business data systems
- No agents or scanning required, also cloud platforms supported
- Most of security frameworks start from identifying what software and hardware assets the organization has
- Validate security policies and automate enforcement
- Can complement existing CMDBs and databases

The Only Solution of Its Kind

Axonius vs. Vulnerability Scanners

Find all your devices — even those that are unknown to vulnerability scanners — at all times.

Axonius vs. Agent-Based Tools

Nobody ever said “we want more agents on our devices.”

Axonius vs. Network Access Control

Unlike NACs, Axonius deploys seamlessly into complex, segmented networks.

Axonius vs. Configuration Management Database

Want to maximize the ROI of your CMDB?

CLOUDIAN S3- COMPATIBLE OBJECT STORAGE.

Cloudian simplifies enterprise storage with limitlessly scalable storage that consolidates massive data sets to a single, easily managed environment.

CLOUDIAN

Cloudian was founded with a clear vision: to revolutionize data storage by bringing object storage to the enterprise.

Unlike the expensive, complex, and proprietary object storage products which came before it, Cloudian's technology allows all sizes and types of users to realize the benefits of object storage in their own data centers.

Cloudian brings the flexibility and simplicity of public cloud storage into our customers' data centers, simplifying management and reducing TCO by 70% versus conventional storage systems.

Cloudian's fully native interoperability with S3 (the de facto standard in S3 object storage) ensures investment protection for developers and data center managers who rely on the thousands of S3-enabled applications available from vendors such as Adobe, Commvault, Hadoop, Evertz, Pure Storage, Rubrik, Splunk, Veeam, Veritas, and others.

EXABEAM IS THE
SMARTER SIEM™
COMPANY.

Exabeam's mission is to make every security practitioner more efficient.

EXABEAM

We help security teams work smarter, allowing them to detect, investigate and respond to cyberattacks in 51 percent less time.

Security organizations no longer have to live with missed distributed attacks and unknown threats, or manual investigations and remediation. With the modular Exabeam Security Management Platform, analysts can collect unlimited log data, use behavioral analytics to detect attacks, and automate incident response, both on-premises or in the cloud.

- Pioneer in the UEBA market and leader in the SIEM market
- Provides user behaviour analytics, leveraging existing log data to detect modern attacks, prioritize incidents efficiently, and help valuable SOC staff respond effectively
- Adds a powerful analytics layer over existing security technologies (Splunk, Qradar, Elasticsearch), detecting new attacks, prioritizing incidents, and guiding a more effective response
- Likely to deliver more value from your existing security solutions and make them better
- “The SIEM You Have Always Wanted”

COMPLETE VISIBILITY.
REAL-TIME DETECTION.
INTELLIGENT RESPONSE.

Help enterprises rise above the noise of alerts, organizational silos, and runaway technology by giving them the perspective they need to secure it.

EXTRAHOP

ExtraHop provides cloud-native network detection and response for the hybrid enterprise.

Our breakthrough approach analyzes all network interactions and applies cloud-scale machine learning for complete visibility, real-time detection, and intelligent response. With this approach, we help the world's leading enterprises rise above the noise of alerts, organizational silos, and runaway technology.

Whether you're investigating attacks, ensuring the availability of critical applications, or securing your investment in cloud, ExtraHop helps you detect threats up to 95 percent faster and respond 60 percent more efficiently.

- Cloud-native network detection and response (NDR) for the hybrid enterprise
- Baselines network traffic and gives complete visibility of network assets and how they communicate
- Uses ML and combines that to rule catalogue to detect attacks and anomalies in the traffic. Timelining around deviations.
- Stores records of the data around deviations for security investigations
- In addition to security, can be used for network performance analytics as well

THE EXTRAHOP DIFFERENCE

With cloud-native network detection and response from ExtraHop, you can focus on the threats that matter and stop breaches 70% faster.

- **Eliminate Blind Spots with Complete Visibility**
- **Detect Threats Other Tools Miss with Real-Time Detection**
- **Clear the Queue Faster with Intelligent Response**

<) FORESCOUT®

DON'T JUST SEE IT.
SECURE IT. FORESCOUT:
THE ENTERPRISE OF
THINGS – SECURED.

Active Defense for the Enterprise
of Things.

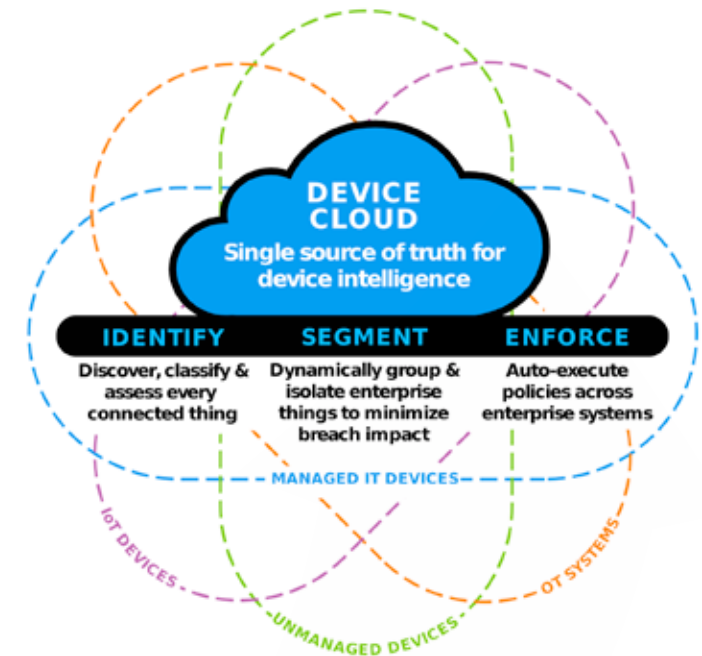

FORESCOUT

Forescout is the leader in Enterprise of Things security, offering a holistic platform that continuously identifies, segments and enforces compliance of every connected thing across any heterogeneous network.

The Forescout platform is the most widely deployed, scalable, enterprise-class solution for agentless device visibility and control. It deploys quickly on your existing infrastructure – without requiring agents, upgrades or 802.1X authentication.

Fortune 1000 companies and government organizations trust Forescout to reduce the risk of business disruption from security incidents or breaches, ensure and demonstrate security compliance and increase security operations productivity.

- Discover, Classify and Asses devices on network
- Implement policies and actions for discovered devices (notify, comply, restrict)
- Orchestrate other network and security solutions based on discoveries and classifications
- “Modern NAC” in variety of ways to implement and suites also for non-managed IoT networks

Forescout actively defends the Enterprise of Things by identifying, segmenting and enforcing compliance of every connected thing.

SECURITY-DRIVEN NETWORKING FOR A HYPERCONNECTED WORLD.

Security Fabric, it starts with the firewall.

FORTINET

Fortinet secures the largest enterprise, service provider, and government organizations around the world.

Fortinet empowers its customers with intelligent, seamless protection across the expanding attack surface and the power to take on ever-increasing performance requirements of the borderless network—today and into the future.

Only the Fortinet Security Fabric architecture can deliver security without compromise to address the most critical security challenges, whether in networked, application, cloud, or mobile environments.

Fortinet ranks number one in the most security appliances shipped worldwide and more than 450,000 customers trust Fortinet to protect their businesses.

- Gartner Leader in UTM, Enterprise Firewall and WAN Edge
- Infrastructure Magic Quadrants
- Security Fabric is a broad, automated and integrated security platform that extends beyond the network to cover other attack vectors. Other infrastructure solutions covered include Secure Access (Wi-Fi and switch)
- Solutions scale from SME to large MSSPs
- SASE and SDWAN solutions covering enterprise end to end networking needs

The Security Fabric

The Fortinet Security Fabric platform provides true integration and automation across an organization's security infrastructure, delivering unparalleled protection and visibility to every network segment, device, and appliance, whether virtual, in the cloud, or on-premises.

NETWORK VISIBILITY & ANALYTICS IS WHAT WE DO.

Real ROI. Real impact.

GIGAMON

Today's IT leaders often overlook opportunities to drive business innovation found in the ones and zeros hidden in their networks.

The Gigamon Visibility and Analytics Fabric™ captures all network data, processes it and sends it to the tools and teams who need it. Using a single integrated platform, digital teams can choose advanced capabilities for easing network burdens, analyzing applications, and detecting and responding to threats.

- Network packet broker to deliver a smarter, more proactive approach to network management, monitoring and security
- Delivers optimized, full-fidelity data to security and performance monitoring tools, dramatically improving tool effectiveness and efficiency
- TAP Aggregation from physical and virtual platforms
- NetFlow Generation, De-duplication, Flow Slicing, TLS/SSL Decryption, Inline Bypass, Application Visualization

Gigamon Visibility and Analytics Fabric

Collect information-in-motion across physical, virtual and cloud infrastructures. And then optimize, decrypt and secure it before distributing to your tools.

SIMPLIFYING MULTI-CLOUD DATA PROTECTION.

Intelligent, application aware, cross-cloud data assurance, data mobility and disaster recovery.

HYCU

We Make it Easy to Thrive in a Hyper-Simple Hyper-converged World

We believe in the art of subtraction, where less is more. Where powerful technology looks extremely simple and delivers extraordinary results. That's why we're so bullish on hyper-converged and why we believe that data management should be as easy as powering up and hitting go.

It's also why our data protection and monitoring products excel at helping IT take back the data center without breaking a sweat. You'll eliminate roadblocks, boost application performance and reliability, and deploy our products before your coffee gets cold.

- HYCU Protégé provides a comprehensive data protection, data migration and DR solution specifically designed for service providers from ground up
- Intelligent, application aware, cross-cloud data assurance, data mobility and disaster recovery
- Multi- Tenancy and Role-Based Access Control with both shared and segregated environments
- Supports a variety of cloud, hyperconvergence, virtualization and bigdata platforms

Born to Deliver

HYCU evolved from a services organization, where customer satisfaction comes first.

Execute with Excellence

From our customer-informed roadmap to the way we design our products, no stone is left unturned. Quality is part-and-parcel of our delivery.

Empower the Players

We give our customers and partners the tools you need to succeed. Because the stronger you are, the better you'll do.

Loyal to the Bone

Whether it's the platforms we support, the partners we do business with, or customers we serve – we're on your team for the duration.

WE PROTECT YOUR DATA AND APPLICATIONS.

Our mission is to protect your critical assets from the ever-changing attacks of cybercriminals.

IMPERVA

Imperva is an analyst-recognized, cybersecurity leader championing the fight to secure data and applications wherever they reside.

Imperva protects and provides a secure foundation for our customers' businesses. Once deployed, our solutions proactively identify, evaluate, and eliminate current and emerging threats, so you never have to choose between innovating for customers and protecting what matters most.

- Secure data and applications wherever they reside
- Application protection:
- With a complete solution for both on-prem and cloud-based WAF, DDoS, CDN, and load balancing, Imperva makes it simple for customers to keep applications available and secure.
- Secures websites against attack—on-prem and in the cloud
- Eliminates downtime due to DDoS attacks
- Leader in both the Forrester Wave and Gartner Magic Quadrant
- Database protection
- Monitors who's accessing what data, when they accessed it, and what they did with the data
- Detects suspicious data access incidents and provides actionable insights

- Alerts or blocks unauthorized data activity
- Masks sensitive data to reduce the potential attack surface

Imperva Protects it All

NETWORKING FOR THE BORDERLESS ENTERPRISE.

Ready to go next level?

INFOBLOX

Infoblox is the pioneer in delivering the world's most reliable, secure and automated networks.

We are relentless in our pursuit of next level network simplicity—the Next Level Network Experience. We empower organizations to manage their continuously evolving and growing networks simply and securely.

We believe that the Next Level Network Experience should be seamless and worry-free, because the network that works best is the one that no one notices.

- Industry leader in automating and securing network
- core services (DDI – DNS, DHCP and IPAM) in both on-prem and cloud environments
- Best DNS security throughout the industry
- Cloud Network Automation and Visibility
- Automatic network provisioning, five nines availability, reduced latency and simplified management

NEXT-LEVEL NETWORKING FOR A CLOUD-FIRST WORLD

- Next-Level Security
- Next-Level Reliability
- Next-Level Automation
- Next-Level Simplicity

LOGRHYTHM IS A WORLD LEADER IN NEXT GEN SIEM.

Built for security professionals, by security professionals.

LOGRHYTHM

LogRhythm is a world leader in NextGen SIEM, empowering organizations on six continents to successfully reduce risk by rapidly detecting, responding to and neutralizing damaging cyberthreats.

The LogRhythm platform combines user and entity behavior analytics (UEBA), network traffic and behavior analytics (NTBA) and security automation & orchestration (SAO) in a single end-to-end solution.

LogRhythm's Threat Lifecycle Management (TLM) framework serves as the foundation for the AI-enabled Security Operations Center (SOC), helping customers measurably secure their cloud, physical and virtual infrastructures for both IT and OT environments.

Built for security professionals by security professionals, the LogRhythm platform has won many accolades, including being positioned as a Leader in Gartner's SIEM Magic Quadrant.

Align your team, technology, and processes to see broadly across your IT and operating environments, uncover threats, and minimize risk — all within a single, unified platform. Learn why the LogRhythm NextGen SIEM Platform is at the center of thousands of SOCs worldwide.

- Detect threats earlier and faster.
- Gain visibility across your environment.
- Work smarter, not harder.
- Build for today, scale for tomorrow.

THE SASE LEADER.

CASB, FW, SWG, and ZTNA built natively in a single platform.

NETSKOPE

Redefining cloud, network and data security

The Netskope Security Cloud provides unrivaled visibility and real-time data and threat protection when accessing cloud services, websites, and private apps from anywhere, on any device. Only Netskope understands the cloud and delivers data-centric security from one of the world's largest and fastest security networks.

Cloud security that is data-centric

The rapid adoption of cloud apps, services, and mobile devices has resulted in data going to places where traditional security technology is blind. Netskope takes a data-centric approach to cloud security, following data everywhere it goes. From data created and exposed in the cloud to data going to unmanaged cloud apps and personal devices, Netskope protects data and users everywhere.

Cloud security that is cloud-smart

Cloud usage dominates the web, with cloud services making up the majority of enterprise web traffic. Securing this environment, without slowing down the business, demands a new security model based on contextual knowledge of the cloud. Netskope enables you to take advantage of our intimate, contextual understanding of the cloud to apply effective security controls that enable you to safely use the cloud and web.

Cloud security that is fast

When it comes to security, performance and scale are often the biggest challenges. Reliance on the public Internet to deliver inline security causes performance challenges, and an appliance-based approach to deploying security does not scale. Netskope delivers real-time, cloud-native security, without the traditional performance trade-off. As we continue to build one of the world's largest and fastest security networks, you can be certain your security is always on, always present, and never a roadblock.

THE LEADER IN OT & IOT
SECURITY AND VISIBILITY.

Unlock visibility across OT, IoT, and
IT for accelerated security and
digital transformation.

NOZOMI NETWORKS

Nozomi Networks is the leader in OT and IoT security and visibility.

We accelerate digital transformation by unifying cybersecurity visibility for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world.

Our innovation and research make it possible to tackle escalating cyber risks through exceptional network visibility, threat detection and operational insight.

- Nozomi Networks is the leader in OT and IoT security and visibility
- Consolidate – Unified OT, IoT and IT Security by seeing assets and risks
- Detect & Respond OT and IoT risks and threats and optimize troubleshooting
- Scales up to thousands of distributed sites
- Closing the gap between OT and IT security
- Extensive coverage for many industries such as Energy, Manufacturing, Mining and Oil & Gas

OUR VISION IS A WORLD
WHERE EACH DAY IS
SAFER AND MORE
SECURE THAN THE ONE
BEFORE.

Your cybersecurity partner, for
today and tomorrow.

PALO ALTO NETWORKS

Palo Alto Networks, the global cybersecurity leader, is shaping the cloud-centric future with technology that is transforming the way people and organizations operate.

Our mission is to be the cybersecurity partner of choice, protecting our digital way of life. We help address the world's greatest security challenges with continuous innovation that seizes the latest breakthroughs in artificial intelligence, analytics, automation, and orchestration. By delivering an integrated platform and empowering a growing ecosystem of partners, we are at the forefront of protecting tens of thousands of organizations across clouds, networks, and mobile devices. Our vision is a world where each day is safer and more secure than the one before.

- Comprehensive security solutions for enterprises and services providers to network, cloud, endpoint and SOC
- ML-powered Next-Generation Firewalls, available in a number of form factors, including physical, virtual and containerized appliances, as well as a cloud-delivered service
- Prisma Cloud Security offerings for protecting cloud and SaaS applications and Prisma Access for SASE and SD-WAN deployments
- Cortex XDR for prevention, detection and response, Cortex XSOAR for security orchestration, automation and response ("SOAR")

Tomorrow's enterprise runs in the cloud. Secure it today. Comprehensive, full lifecycle for any and all clouds.

Secure your enterprise against tomorrow's threats, today. Protect users, applications and data anywhere with intelligent network security from Palo Alto Networks.

Tomorrow's SOC uses AI and ML to turn the tedious into the automatic. Stop tomorrow's threats today with industry-leading detection.

PROTECTION STARTS WITH PEOPLE.

Email, social media, and mobile devices are the tools of your trade—and for cyber criminals, the tools of attack.

PROOFPOINT

Email, social media, and mobile devices are the tools of your trade—and for cyber criminals, the tools of attack. Proofpoint protects your people, data and brand against advanced threats and compliance risks.

Most cyber attacks target people, not technology. That's why our approach to cybersecurity centers around people. Our company helps you understand the individual risk people pose. We stop the threats that target them and provide the tools they need to stay safe and alert. No other cybersecurity company protects people and brands more effectively than we do.

Threat Protection

Stop email and cloud-based threats, including malware, phishing, compromised credentials and email fraud.

Information Protection

Protect your most sensitive data and comply with ever-evolving regulations—without the headaches and costs of legacy data protection tools.

User Protection

Reduce successful phishing attacks and malware by empowering your people to spot and report unsafe email and by safeguarding their personal digital activity.

Ecosystem Protection

Secure the digital channels you don't own. Block impostor attacks and malicious content that use trusted and lookalike email and web domains, social media, the dark web, and more.

Compliance

Collect, archive, supervise and monitor sensitive data in a compliant and legally defensible manner without the cost and hassle of traditional compliance tools.

ONE PLATFORM FOR INSTANT RECOVERY, SEARCH, DEVELOPMENT, AND CLOUD.

Unlock the Power of Data by
Organizing and Protecting the
World's Business Information.

RUBRIK

With Rubrik, your applications and data are instantly accessible in an immutable format. Resume business within minutes of the attack.

Lower Costs

with one solution that provides recovery, DR orchestration, and data security, all extensible to cloud. See how a US state insurance company achieved 47% TCO reduction and \$2.6 million in benefits.

Increase Productivity

by automating manual tasks. See how a Fortune 500 consulting firm returns 32 days of additional productivity to the business.

Reduce Risk

of non-compliance with sensitive data exposure. Avoid revenue and brand reputational loss from ransomware. See how ASL Airlines has averted ransomware and saved millions.

Move Faster

with instant data access and copy data management. Instantiate a developer environment in the cloud.

- Rubrik has developed the world's first converged data management platform to deliver web-scale backup for virtual environments
- Single platform for instant recovery, search, development and multi-cloud data management
- Easy to scale and quick to deploy, low learning curve
- Reduces risk by automating manual and time taking tasks from a centralized management platform to all relevant platforms

NEVER WORRY
ABOUT OUR API'S
AGAIN.

Only Salt Security, with our API Context Engine (ACE) Architecture, can discover all your APIs, stop every API attack, and eliminate API vulnerabilities in development.

SALT SECURITY

Context-based security for all your APIs

Only Salt delivers the context you need to protect your APIs across build, deploy, and runtime phases. We combine complete coverage and an ML/AI-driven big data engine to provide that context to show you all your APIs, stop attackers during the early stages of an attempted attack, and share insights to improve API security posture.

Salt - the new approach to API security

Salt protects the APIs at the core of every modern application with security across the full API lifecycle. Our advantages derive from our cloud-scale big data engine powered by our patented and time-tested AI and ML algorithms -- together, they form the core of our API Context Engine (ACE) Architecture.

We scan and test your REST, GraphQL, and other APIs while they're still in development. In runtime, we cover all your application environments, getting a copy of your API traffic. We store hundreds of attributes about thousands of APIs and thousands of users over time. We baseline your environment and use AI and ML to pinpoint anomalies. Reduce successful phishing attacks and malware by empowering your people to spot and report unsafe email and by safeguarding their personal digital activity.

The Salt platform automatically discovers all your APIs and exposed sensitive data, pinpoints and blocks attackers, and tests and scans your APIs during the build phase and provides remediation insights learned in runtime so your dev teams can improve your API security posture.

DEFEATING EVERY
ATTACK. EVERY SECOND.
EVERY DAY.

SentinelOne is rewriting the new
normal in endpoint security with
more capability and ease of use.

SENTINELONE

Sentinelone's Autonomous Endpoint Protection Saves You Time by Using Multiple AI Engines, Providing Complete Visibility into All Activity, and Even Rolling Back Threats with a Single Agent.

- EPP and EDR solution in a single lightweight agent
- Supports Windows, MacOS and Linux operating systems, also cloud workloads
- Highly autonomous and low time consuming for administrators
- Detection, Response and Rollback capabilities
- Threat Hunting for SOC purposes
- Ranger IoT for IoT discovery and control

Prevention

AI-powered models identify malware and ransomware binaries before they detonate with high degrees of precision.

ActiveEDR

Build critical context for proactive real-time detection & response and long term threat hunting in a user-friendly fashion.

IoT

Ranger® IoT rogue device discovery provides visibility into all managed and unmanaged network devices and control over those devices.

Workloads

Migration of workloads to private and public cloud infrastructure is a key part of your digital transformation. Complete protection, visibility, and control.

THE CYBER EXPOSURE COMPANY

Close your cyber exposure gap with full visibility of the modern attack surface.

TENABLE

Empower all organizations to understand and reduce their cybersecurity risk. Cybersecurity is one of the existential threats of our time.

New types of connected devices and compute platforms, from Cloud to IoT, have exploded the cyber attack surface. And more tools collecting more data doesn't equate to actionable insight for the CISO, C-suite and Board of Directors. The old way of simply scanning on-premises IT devices for vulnerabilities is no longer enough. It's time for a new approach. Today, approximately 40,000 organizations around the world rely on us to help them understand and reduce cybersecurity risk. Our goal is to arm every organization, no matter how large or small, with the visibility and insight to answer four critical questions at all times: Where are we exposed? Where should we prioritize based on risk? Are we reducing our exposure over time? How do we compare to our peers? Tenable.io, the world's first Cyber Exposure platform, arms Security with the visibility to see their entire cyber attack surface at all times (from IT to Cloud to IoT to OT) and arms the CISO, C-suite and Board of Directors with the insight to focus on the issues which matter most and make better strategic decisions.

We believe in a future where:

- Every Security team will have a live view into their organization's Cyber Exposure at all times.
- Cyber Exposure will arm the CISO and CIO with insight into cyber risk with the same accuracy and predictability as other organizational systems of record.
- Every strategic business decision will factor in Cyber Exposure as a quantifiable metric of cyber risk, in the same as other business exposures.
- Cyber Exposure data will be a must-have for every Board of Directors meeting. We believe the future doesn't need to be in the future. We believe the future is now. And we're here to lead the way.

THALES

THE PEOPLE WE ALL
RELY ON TO MAKE THE
WORLD GO ROUND -
THEY RELY ON THALES.

Building a future we can all trust.

THALES

The people you rely on to safeguard your privacy rely on Thales to protect their data, the cloud and software.

Securing sensitive data is a priority for every organization. Whether your data is at rest, in motion, or in use, you can rely on Thales to enable the most effective encryption strategies for your enterprise environments.

Thales helps businesses and organizations defend their data in a digital world where there is no defined perimeter. Thales solutions help organizations secure their cloud transformation, reduce breach exposure and achieve compliance with encryption and key management solutions that keep you in control of your data in any cloud while also providing simple, secure access to cloud services with integrated access management, authentication and single sign-on.

How will you secure your data in the cloud?

Does your enterprise have an encryption strategy?

Do you have secure access to all of your cloud services?

- Leader in encryption and key management solutions helping organizations to keep control of data
- Helps addressing compliance requirements and are the HSM of choice for Microsoft, AWS and IBM cloud platforms
- Data encryption and protection to prevent breaches
- Another solution line for integrated access management, authentication and single sign-on solutions
- MFA and SSO solutions for onprem, cloud and hybrid environments

Simplify data security & accelerate time to compliance

- Discover, classify, and protect sensitive data to meet data privacy and security regulations

Achieve cloud security

- Multi-cloud support with centralized management of keys for AWS, Azure, Salesforce, and IBM cloud
- Hybrid HA clustering for easy cloud migration

Delivers high assurance

- High assurance embedded or network HSM
- Continued FIPS 140-2 L2/L3 certifications, and FIPS 140-2 L1 validated agents

A GLOBAL LEADER IN
NETWORK SECURITY
POLICY AUTOMATION.

Our products enable IT Security to regain visibility and control security policies, powered by automation that integrates with DevOps.

TUFIN

Tufin enables organizations to automate their security policy visibility, risk management, provisioning and compliance across their multi-vendor, hybrid environment.

Customers gain visibility and control across their network, ensure continuous compliance with security standards and embed security enforcement into workflows and development pipelines.

Eliminate the security bottleneck and increase the business agility of your organization.

SecureTrack

Gain the vendor-agnostic visibility and control you need to secure your hybrid network across firewalls and NGFWs, routers and switches, SDN and hybrid cloud.

SecureChange

Tufin SecureChange provides policy-based automation and orchestration, enabling enterprises to implement accurate network changes in minutes instead of days.

SecureApp

Application-driven automation for managing network security policies

SecureCloud

Tufin SecureCloud revolutionizes cloud security. Companies no longer need to compromise agility for security. Leverage SecureCloud's policy-centric automation-based approach to secure your journey to the cloud. Gain confidence knowing your cloud-native, hybrid cloud, and Kubernetes applications are properly configured and secure.
