NOZOMI NETWORKS

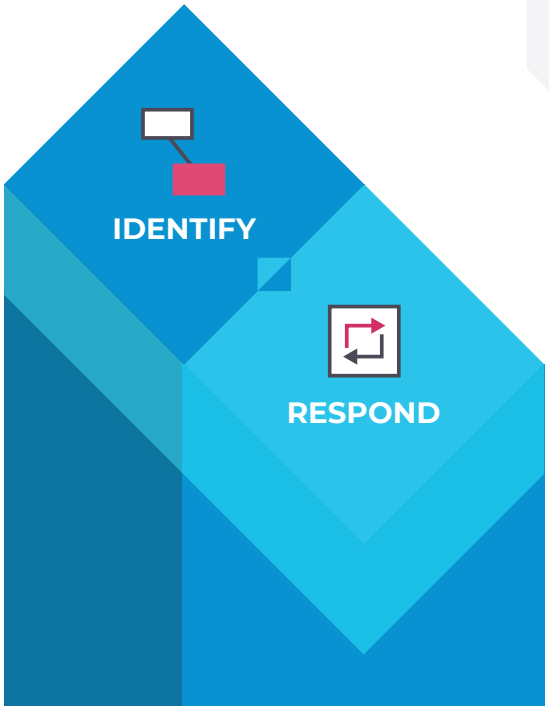
DATA SHEET

Asset Intelligence

Focus on the OT and IoT Incidents that Matter

Nozomi Networks **Asset Intelligence**™ continuously updates **Guardian**™ appliances with rich OT and IoT device data so you can identify and respond to the most important security alerts faster.

Guardian's anomaly detection for IoT leverages millions of OT and IoT asset profiles for asset identification and anomaly alerting at enterprise scale.



See

All OT and IoT devices and behavior on your networks for unmatched awareness

Detect

Cyber threats, vulnerabilities, risks and anomalies for faster response

Unify

Security, visibility and monitoring across all your assets for improved resiliency

Identify

Intelligence that Reduces the Mean-Time-to-Response (MTTR)

Rapidly Pinpoint Harmful Anomalies

Up-to-Date OT and IoT Device Data

Classifies assets with high precision to accelerate the learning process for OT and IoT environments

Compares real-time activity to “known-good” baselines, even during Learning Phase, to detect potentially harmful behavior

Rich Asset Profile and Behavior Data

Provides detailed device information, including:

- Type
- Manufacturer
- Behavior
- Configuration (installed software)
- Protocols in use

Automatically Eliminate Benign Anomaly Alerts

Breakthrough Anomaly Detection for IoT

Uses intelligence from millions of OT and IoT asset profiles to determine when to generate alerts on anomalous behavior

Eliminates alerts caused by benign anomalous behavior by knowing when "new" or "different" is not a risk, focusing your attention on "true" incidents

Provides the Context to Manage OT and IoT Risks

Delivers constantly updated knowledge derived from monitoring millions of assets to recognize “normal” behavior

Compares new behavior to device profiles to identify reliability risks caused by cyber threats and operational anomalies

Breakthrough Anomaly Detection for OT and IoT

Rapid Identification of Assets

Ensures Precise Asset Inventory

Accurate Anomaly Alerts

Accelerates Incident Response

Asset Intelligence for Dynamic Networks

Sustains Accurate Inventory & Detection

Respond

Detailed Alerts and Forensic Tools for Fast Response

Quickly Respond Using Detailed, Accurate Information

Accurate Asset Intelligence

Ensures up-to-date asset profiles through the expertise of Nozomi Networks Labs, a team of specialized security researchers

Delivers accurate profiles based on analysis of millions of devices in use at sites around the world and in Nozomi Networks test lab

Detailed, Helpful Alerts

Provides detailed alerts that pinpoint significant security and reliability anomalies

Groups alerts into incidents, providing security and operations staff with a simple, clear, consolidated view of what's happening on their network

Swiftly Analyze Incidents and Simplify IT/OT Processes

Simplified IT/OT Security Processes

Reduces costs with a single, comprehensive OT and IoT anomaly detection solution

Integrates with IT security infrastructure for streamlined security processes, see: **nozominetworks.com/integrations**

Harmonizes security data across enterprise tools for cohesive response

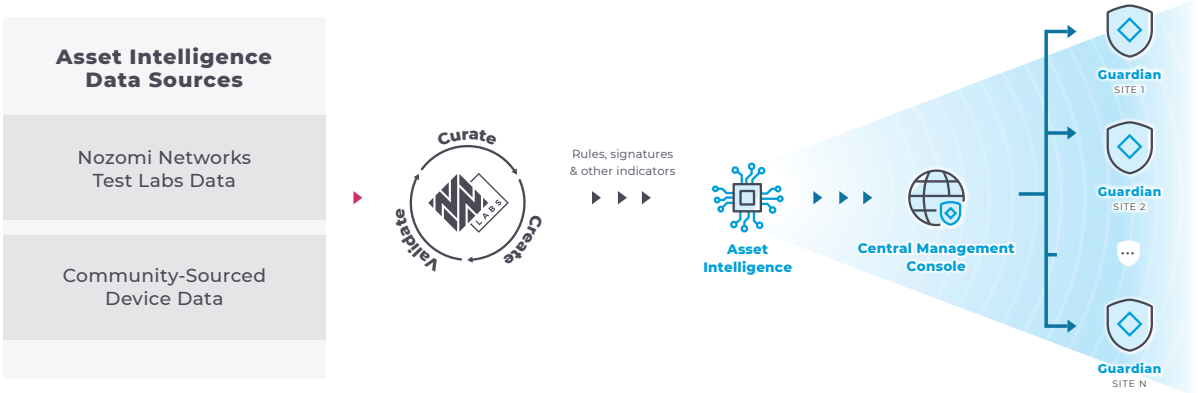
Fast Forensic Analysis

Focuses effort with Smart Incidents™ that:

- Correlate and consolidate alerts
- Provide operational and security context
- Supply automatic packet captures

Decodes incidents with Time Machine™ before and after system snapshots

Provides answers fast with a powerful ad hoc query tool



Continuous Asset Research reduces response time to harmful anomalies and active threats.

Products and Services

SAAS

Vantage leverages the power and simplicity of SaaS to deliver unmatched security and visibility to your OT, IoT and IT networks. Its scalability enables you to manage all of your Guardian deployments and protect any number of locations from anywhere in the world.

Currently in Limited Availability.
For more information, visit **nozominetworks.com/vantage**

PRODUCT

Guardian provides industrial strength OT and IoT security and visibility. It combines asset discovery, network visualization, vulnerability assessment, risk monitoring and threat detection in a single solution. Guardian accelerates your security and simplifies your IT and OT convergence.

SUBSCRIPTION

The **Threat Intelligence** service delivers ongoing OT and IoT threat and vulnerability intelligence. It helps you stay on top of the dynamic threat landscape and reduce your mean-time-to-detection (MTTD).

GUARDIAN ADD-ON

Smart Polling adds low-volume active polling to Guardian's passive asset discovery, enhancing your asset tracking, vulnerability assessment and security monitoring.

PRODUCT

The **Central Management Console** (CMC) consolidates OT and IoT risk monitoring and visibility across your distributed sites, at the edge or in the cloud. It integrates with your IT security infrastructure for streamlined workflows and faster response to threats and anomalies.

SUBSCRIPTION

The **Asset Intelligence** service delivers ongoing OT and IoT asset intelligence for faster and more accurate anomaly detection. It helps you focus efforts and reduce your mean-time-to-response (MTTR).

GUARDIAN ADD-ON

Remote Collectors are low-resource appliances that capture data from your distributed locations and send it to Guardian for analysis. They improve visibility while reducing deployment costs.

Nozomi Networks

The Leading Solution for OT and IoT Security and Visibility

Nozomi Networks is the leader in OT and IoT security and visibility. We accelerate digital transformation by unifying cybersecurity visibility for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world. Our innovation and research make it possible to tackle escalating cyber risks through exceptional network visibility, threat detection and operational insight.
