Feature Description

Nutanix HCI Management

Infrastructure management	Manage physical and virtual infrastructure and associated services.
Monitoring and troubleshooting	Monitor key metrics of infrastructure and enable analysis for troubleshooting.
Enterprise AuthN + RBAC	Industry-standard authentication and fine-grained RBAC on infrastructure.
1-click upgrades via LCM	Easy full-stack upgrades of all components via Life Cycle Manager (LCM).
Comprehensive search	Search across infrastructure and activity for quick access to what you are looking for.

Operational Insights

Customizable dashboard	Enable customers and partners to customize how they consume machine intelligence.
Reporting	Report the intelligence through human-readable PDF or machine-readable CSV.
Application discovery	Discover the application and its dependency automatically.

Automated Optimization

Capacity forecast	Forecast capacity shortage and create actionable signals based on machine learning.
VM inefficiency detection and right-sizing	Detect resource inefficiency and enable right-sizing governed by your ops process.
Just-in-time planning	Recommend a capacity expansion plan that fits business growth.

Proactive Remediation

Anomaly detection	Detect performance anomaly and provide early warning using machine learning
Advanced troubleshooting	Enable quick and collaborative troubleshooting
Monitoring for non-AOS Virtual infrastructure	Monitor VMware virtualized environment from non-Nutanix infrastructure.
Application monitoring	Enable observability of the app to provide a full-stack view. Requires the content pack.

Smart Automation

Low-code/no-code operations automation	Empower IT team to automate daily operations with ease and confidence.
--	--

Cost Management for Nutanix

Cost metering for resources	Provide TCO-based cost visibility for all Nutanix environments.
Budgeting and chargeback	Provide financial governance of spending by business entities/cost centers by policies.

Content Pack

SQL Server monitoring	Provide observability for key performance metrics in Microsoft SQL Server in Prism.
