Exclusive Networks

Cloud Certified Training

Avoid vendor specific training courses from AWS, Azure and Google that fragment knowledge, skew your understanding and cut off you and your customers from the full spectrum of cloud possibilities.

Arcitura CERTIFIED — Cloud Professional

Certified Cloud Professional
has mastered the fundamental topic areas of cloud computing, and has met minimum CCP qualifications by demonstrating proficiency in at least one additional area.

Module-Specific Exams: C90.01 + any one additional exam

Arcitura CERTIFIED — Cloud Technology Professional

Certified Cloud Technology Professional
has proven knowledge and capabilities concerning the identification, positioning and utilisation of modern cloud technologies, resources, associated concepts and decision-making criteria.

Single Combined Exam: C90.CTP – OR – Module-Specific Exams: C90.01, C90.02, C90.03

Arcitura CERTIFIED — Cloud Architect

Certified Cloud Architect
is proficient in the technology architecture that underlies cloud platforms and cloud-based IT resources/solutions, and has mastered the hands on application of design patterns, principles and practices used to engineer and evolve such environments.

Single Combined Exam: C90.CAR – OR – Module-Specific Exams: C90.01, C90.02, C90.04, C90.05, C90.06

Arcitura CERTIFIED — Cloud Security Specialist

Certified Cloud Security Specialist
has detailed knowledge of common security threats, security controls and associated technologies/practices related to securing cloud platforms, cloud services and a range of IT resources based on typical cloud technologies.

Single Combined Exam: C90.CSE – OR – Module-Specific Exams: C90.01, C90.02, C90.07, C90.08, C90.09

Arcitura CERTIFIED — Cloud Governance Specialist

Certified Cloud Governance Specialist
is proficient in defining, establishing and evolving governance controls and frameworks specifically for cloud-based IT resources and platforms, in support of organisational and technological governance requirements.

Single Combined Exam: C90.CGO – OR – Module-Specific Exams: C90.01, C90.02, C90.10, C90.11, C90.12

Arcitura CERTIFIED — Cloud Storage Specialist

Certified Cloud Storage Specialist
has an in-depth level of proficiency over the mechanisms, devices, technologies, practices and overall assessment criteria concerning cloud storage technologies and services.

Single Combined Exam: C90.CST – OR – Module-Specific Exams: C90.01, C90.02, C90.13, C90.14, C90.15

Arcitura CERTIFIED — Cloud Virtualization Specialist

Certified Cloud Virtualization Specialist
is proficient in applying virtualisation technologies, devices and mechanisms in both on-premise and cloud-based environments.

Single Combined Exam: C90.CVI – OR – Module-Specific Exams: C90.01, C90.02, C90.16, C90.17, C90.18

Arcitura CERTIFIED — Cloud Capacity Specialist

Certified Cloud Capacity Specialist
has proven capabilities in the capacity planning, monitoring and management of cloud platforms and cloud-based solutions to ensure that technology architecture layers within cloud environments transparently grow and evolve in response to new demands.

Single Combined Exam: C90.CCA – OR – Module-Specific Exams: C90.01, C90.02, C90.19, C90.20, C90.21

Each Cloud Certified Professional (CCP) Certificate of Excellence is proof of professional competency in a formalised field of practice in the cloud computing industry. Please see below for available certification tracks, exam format options, exam delivery options and individual certification descriptions.

Module	Certified Cloud Professional	Certified Cloud Technology Professional	Certified Cloud Architect	Certified Cloud Security Specialist	Certified Cloud Governance Specialist	Certified Cloud Storage Specialist	Certified Cloud Virtualization Specialist	Certified Cloud Capacity Specialist
Module 1: Fundamental Cloud Computing	●	●	●	●	●	●	●	●
Module 2: Cloud Technology Concepts	●	●	●	●	●	●	●	●

Module 18: Cloud Virtualization Lab							●	
Module 19: Fundamental Cloud Capacity								●
Module 20: Advanced Cloud Capacity								●
Module 21: Cloud Capacity								●

Exam Format Options

For each certification, candidates have three flexible exam format options:

- Complete one module-specific exam for each course module in a certification track. Recommended for those who want to progress gradually through a track and who would like to be assessed after each course module before proceeding to the next.

- Complete a single combined exam for the entire certification track. Recommended for those who want to only take a single exam that encompasses all course modules within a track.

- Complete a partial exam for a certification track. Recommended for those who have already obtained a certification and would like to achieve another certification without having to be retested on Modules 1 and 2 (because Modules 1 and 2 are common to all tracks). Partial exams only encompass the courses specific to a certification track. For example, for the Cloud Architect certification, the partial exam only encompasses topics from Modules 4, 5 and 6.

Exam Delivery Options

For each certification, candidates can take advantage of the following available exam delivery options:

- Take exams or exam retakes via Exclusive Networks Global Services.

- Take exams or exam retakes via Exclusive Networks testing centres or during private on-site workshops (Note that exams taken during workshops do not need to correspond to workshop courses).

- Take exams or exam retakes at Pearson VUE testing centres and via Pearson VUE online proctoring. Note that not all exam formats may be available via all exam delivery options. Contact your account representative to learn more about available formats and delivery options for exams you would like to take.
