

# Scalable Secure Access for Your Increasing Mobile Workforce

## Free Trial Until September 30, 2020

To support growing work-from-home populations, many organizations are being faced with the immediate need to dramatically scale up their VPN infrastructure and provide secure remote access to applications previously accessible only via machines on the corporate network. Proofpoint Meta can help you address these challenges. This scalable, cloud-based solution can quickly and easily expand your capacity for client-based remote access. It enables secure browser-based access to behind-the-firewall applications. And it provides your people with a simple, high-performance user experience.

Because Proofpoint Meta is cloud-based, implementation can happen quickly—with no additional hardware to install. Proofpoint Meta is delivered to your users with either a client or clientless web browser-based login. This allows secure connections for any user, whether they have a corporate managed device or their own device. Proofpoint Professional Services can help get most organizations implemented with scalable remote access enabled in a matter of hours.

## Help your organization work effectively remotely

Proofpoint customers can receive free implementation and access to Proofpoint Meta until September 30 to help you maintain business continuity as your users transition to different working environments.

### Offer Details:

**Who:** Proofpoint Enterprise customers

**What:** Proofpoint Meta, which can be implemented with the Meta Client, MetaConnect (clientless) or both

**When:** Signup ends April 30, 2020, and the free Meta service ends on September 30, 2020

#### Terms:

This offer is only for use with the corporate network, not internet access, and is limited up to 5 gigabytes (GB) per user per month. A maximum of 10,000 users per customer may be enabled under this offer. Signup ends April 30, 2020 and the free Meta service ends on September 30, 2020. Under this offer, MetaConnect only provides access to web applications and does not enable Remote Desktop Protocol or Virtual Network Computing. Additionally, under this offer the Meta client is limited to corporate applications in split tunnel mode only for intranet access only. Assistance with implementation subject to availability. No service level guarantees apply to this free offer.
