

FORTINET

FortiDemo Quick Step Guide

Cloud Based Demo Environment

FortiDemo

FortiDemo is a cloud based demo environment which can be started from any location with internet access.

The demo environment contains several Fortinet Products which are fully licensed and properly set up for a customer demo. Watch the demo videos on the FortiDemo Portal to obtain more details and examples of demo scenarios that can be done with the current demo topology.

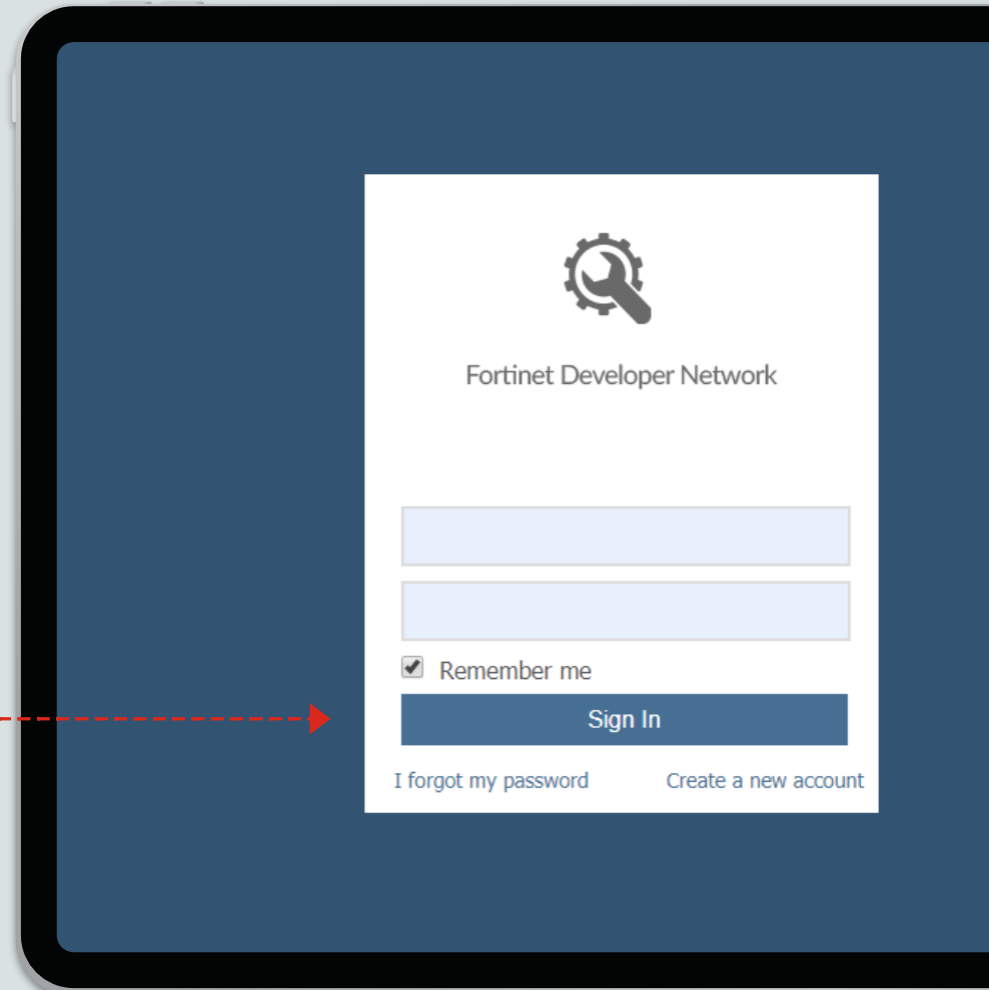

Step 1

Login to Fortinet Developer Network

fdn.fortinet.net/index.php?/one-click-demo/&module=index&controller=nse8

LOGIN

Step 2

Watch the introduction video

CLICK HERE

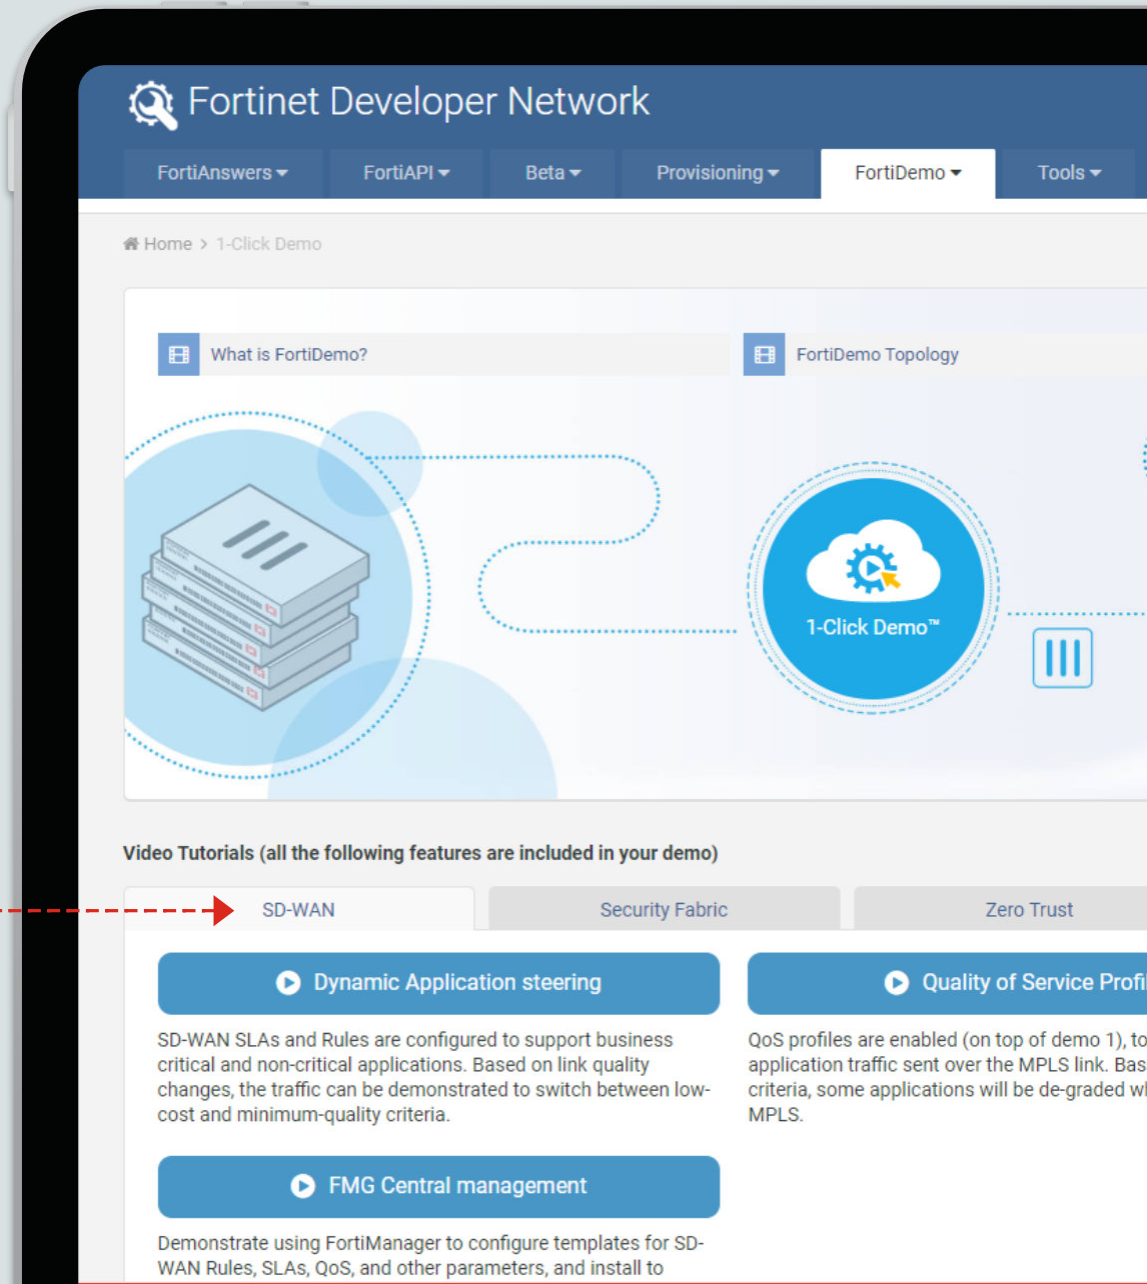

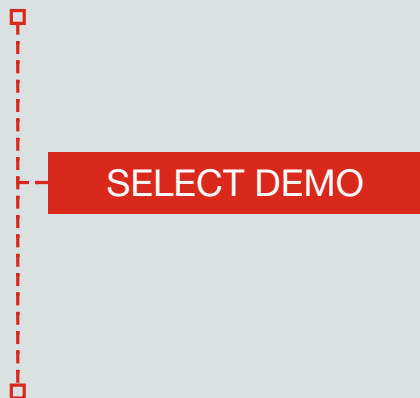

The screenshot shows the Fortinet Developer Network website. The navigation bar includes links for FortiAnswers, FortiAPI, Beta, Provisioning, FortiDemo, and Tools. The breadcrumb trail shows 'Home > 1-Click Demo'. The main content area features a video player for 'What is FortiDemo?' and a 'FortiDemo Topology' link. Below this, there are sections for 'Video Tutorials' with tabs for SD-WAN, Security Fabric, and Zero Trust. Under the SD-WAN tab, there are three video links: 'Dynamic Application steering', 'Quality of Service Profiles', and 'FMG Central management'. Each video link has a brief description of the content.

Step 3

Discover the capabilities of each demo via the video tutorials

Several demo scenarios are available for the following solutions.

- SD-WAN
- Security Fabric
- Zero Trust
- Cloud VM
- Advanced Threat

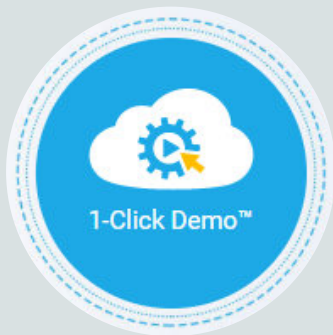

Step 4

Setup your customer demo on FNDN/1-Click Demo Portal

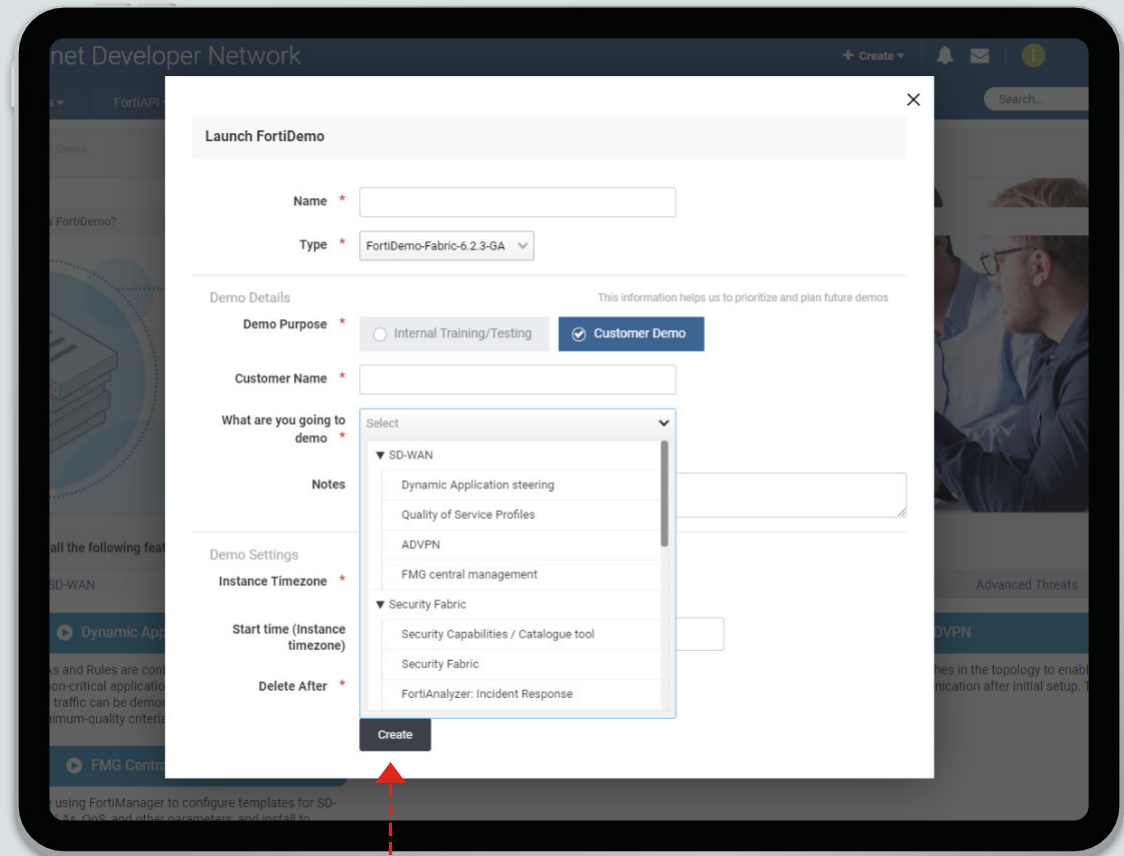

Click on 1-Click Demo icon

A **CLICK**

Fill in the demo details

B **ENTER DETAILS**

C **CREATE**
