

# Pulse Access Suite Plus Delivers Zero Trust Access

Comprehensive Secure Access for productivity, visibility, and compliance

Pulse Secure delivers Secure Access solutions that enterprises rely on to make their workforce more productive while ensuring compliant and protected access for hybrid IT.

The Pulse Access Suite provides easy access for users and a single-pane-of-glass to streamline provisioning, management and scalability. Organizations can centrally orchestrate Zero Trust policy as each solution integrates adaptive identity and device authentication, protected connectivity, extensive visibility and analytics, and threat response across mobile, network and multi-cloud environments.

## Overview

Pulse Secure provides easy, comprehensive software-driven Secure Access solutions for people, devices, things and services that improve visibility, protection and productivity for our customers. Our solutions and Suite uniquely integrate cloud, mobile, application and network access to enable hybrid IT in a Zero Trust world.

## Pulse Access Suite Plus

Pulse Access Suite Plus delivers protected connectivity, operational intelligence, and threat response across mobile, network, and multi-cloud environments – providing superior user experience and single-pane-of-glass management. Secure Access management is simplified with centralized policy administration, a unified appliance platform, broad endpoint client coverage, and standards-based infrastructure and cloud interoperability.

ESSENTIALS PLUS	ADVANCED PLUS	ENTERPRISE PLUS
Zero Trust Access for Hybrid IT	Zero Trust Access with BYOD and IoT	Enterprise-Grade Zero Trust Access and Resiliency
VPN, Cloud and Endpoint Compliance	Access Optimization, Enforcement and Enhanced Management	Access Service Delivery and High Availability
<ul style="list-style-type: none"> <li>Protected connectivity with active user authentication, endpoint compliance</li> <li>Network and cloud SSO</li> <li>Mobile VPN and MDM for BYOD</li> <li>Network endpoint and IoT device discovery, profiling, tracking</li> <li>Centralized visibility and management</li> </ul>	<b>ESSENTIALS PLUS EDITION</b> <i>with</i> <ul style="list-style-type: none"> <li>Network access control for guest, privileged and service users</li> <li>Endpoint and IoT device enforcement</li> <li>Network access segmentation</li> <li>Anomaly detection and response</li> <li>Automated ecosystem threat response</li> <li>Optimal Gateway Selection</li> <li>Flexible license management</li> </ul>	<b>ADVANCED PLUS EDITION</b> <i>with</i> <ul style="list-style-type: none"> <li>SLA-based performance</li> <li>High availability</li> <li>Emergency capacity</li> <li>Disaster recovery</li> </ul>

The Suite is designed for procurement ease with flexible add-on capabilities, deployment and licensing to provide reduced total cost of ownership. It provides dynamic endpoint and access oversight, offers granular access policy enforcement, and works with a customer's existing infrastructure and access ecosystem.

As a result, organizations can consolidate disparate remote and cloud access tools, reduce security exposures and control gaps, and gain operational efficiencies and economies.

# Support Top Hybrid IT Secure Access Initiatives

## Essentials Plus offers

- Secure, seamless hybrid IT access for desktops, laptops, mobile and IoT devices (agent and agentless).
- Centralized, cloud-based management of Secure Access infrastructure with extensive interoperability.
- In-depth access visibility into users, endpoints, IoT devices and applications - remote and on the network.
- Identity, device, and security state authentication with Multi-factor Authentication (MFA) and Single Sign-On (SSO).
- Protected connectivity: always-on, per-app and on-demand VPN with simultaneous and split-tunneling.

## Advanced Plus adds

- On-premises role-based and device access enforcement; guests, privileged users, endpoint and IoT devices (wired and Wi-Fi).
- Optimal Gateway Selection that connects users to nearest available application gateway for best response.
- Auto-threat response and network segmentation leveraging access ecosystem, and User and Entity Behavior Analytics (UEBA).
- Global License Server facilitating regional secure connectivity management.

## Enterprise Plus adds

- Robust disaster recovery capabilities across regions, data centers and cloud.
- Flexible load balancing for applications and gateways to ensure optimized traffic flow and user experience.
- In Case of Emergency (ICE) licensing to address dramatic peaks or change in demand.
