

### Primary Benefits

- Best-in-class endpoint prevention
- Holistic visibility across endpoint, network and cloud
- Accelerated investigation and response

### Capability Overview

- Security orchestration, automation and response (SOAR)
- Case management
- Real-time collaboration
- Threat intelligence management

### Differentiators

- Integrated endpoint, network and cloud data
- AI-driven endpoint prevention, receiving a “AA” rating from NSS Labs
- Top attack technique coverage in MITRE ATT&CK testing
- Reduction of investigations by 88%
- Reduction of alert fatigue by 98%
- TCO of detection and response lowered by 44%

### Use Cases

- Endpoint threat prevention
- Endpoint detection and response
- Extended detection and response
- Managed detection and response
