ML-Powered NGFWs

Primary Benefits

- Protection against network-based attacks
- Simplified network security
- Protection for all apps, data, users and devices

Capability Overview

Physical, Virtual, Containerized, Cloud-Delivered

- App-ID, User-ID, Content-ID and Device-ID for context-based policy
- TLS decryption
- Network segmentation
- Site-to-site VPN
- High availability
- NGFW capabilities for any cloud

Differentiators

- ML-powered technology
- Integrated capabilities that replace multiple other products
- Centralized management for all form factors

Use Cases

- Data center and hybrid cloud security
- Perimeter security
