Prisma Cloud

Primary Benefits

- Comprehensive security across hybrid and multi-cloud environments
- Full lifecycle security, integrated across build, deploy and run

Capability Overview

- Asset inventory
- Configuration assessment
- Compliance management
- Data security
- Vulnerability management
- Runtime defense
- Application security
- Network visibility
- Microsegmentation
- Inline security
- User and entity behavior analytics (UEBA)
- IAM security

Differentiators

- Combined visibility and protection for the world's four largest clouds
- Unified agent framework to protect hosts, containers and Kubernetes, PaaS/on-demand containers and serverless
- Full-lifecycle security spanning build, deploy and run

Use Cases

- Cloud security posture management
- Cloud workload protection
- Cloud network security
- Cloud infrastructure entitlement management
