

## ARUBA CX 10000 PROMOTION

The Aruba CX 10000 Series Switch with Pensando provides an entirely new class of switching solutions

### ARUBA CX 10000

The Aruba CX 10000 Series Switch helps overcome the limitations of legacy architectures to provide best-of-breed Aruba data center L2/3 switching with the industry's only, fully programmable DPU (Pensando Elba). This delivers stateful software-defined services inline, at scale, with wire-rate performance and orders of magnitude scale and performance improvements over traditional data center L2/3 switches at a fraction of their TCO.

Engineered to optimize network bandwidth and performance, the Aruba CX 10000 delivers up to 100X the scale and 10X the performance at one-third of the TCO of legacy switching and security solutions.

### ARUBA FABRIC COMPOSER (AFC)

AFC is an intelligent, API-driven, software-defined orchestration solution that simplifies and accelerates network provisioning, security management and day-to-day operations across rack-scale compute and storage infrastructure.

When paired with an Aruba OS-CX switch, AFC can also support non-HPE environments such as VMware vSphere, VMware NSX, Nutanix Prism and others, allowing for all the benefits of automated fabric provisioning and end-to-end visibility.

**PURCHASE THE ARUBA CX 10000 SERIES SWITCH AND GET A BASE SERVICES LICENSE + 3 YR AFC FOR ONLY \$1,000!  
(WORTH OVER \$15,000)**
