ThriveDX

SECURITY AWARENESS TRAINING FOR GOVERNMENTS

Protect National Assets With Award-Winning Security Training And Phishing Solutions

ThriveDX's Security Awareness Training is a fully-customizable, enterprise-ready, government-oriented awareness and phishing solution. Developed by former ethical hackers and cyber military defense experts, our behavior-changing program effectively trains employees and reduces the risk of threats, vulnerabilities, and attacks.

Why ThriveDX?

Attack Simulations Built for Your Needs

ThriveDX's security experts will tailor unique advanced attack scenarios to best test and fit your organization's unique cyber risks.

Optimize Results with Customization

Ensure that the training you deliver is optimized for your organization's employees with customizable content and attack templates.

Build a Human Firewall

Reduce threats and attacks through continuous targeted employee training, building a powerful cyber culture and human firewall.

Maximize Security with On-Premise Deployment

Easily schedule all of your future security trainings and targeted awareness campaigns ahead of time, all in one-go.

Interactive Training for Developers

Effectively train your developers with Kontra (powered by ThriveDX) and easily import our content into your LMS for fast integrations and deployment.

Ensure Compliance with Training and Reports

Create long-term cyber-culture changes that ensure employees react instantly in order to mitigate risk. Receive custom reports that verify compliance across your organization.

How It Works

Effective training starts where technical protection ends.

Generic training is ineffective as every company is subject to different tech stacks, policies, and regulations.

ThriveDX's custom-tailored training and phishing solutions are built to solve your specific needs.

ASSESS BASELINE
Uncover your organization's weakest points with baseline testings that evaluate your vulnerabilities.

RECOMMENDED ATTACKS
Get custom recommended attacks and awareness campaigns based on the results of our baseline testings.

REAL-WORLD SIMULATIONS
Execute a variety of realistic phishing attacks to maintain resilience across your entire organization.

PERSONALIZED TRAINING
Optimize every employee's learning experience with ongoing educational content personalized to fit their needs

CUSTOM REPORTS
Our real-time dashboards provide powerful insights so stakeholders can gain transparency and act quickly.

What Our Customers Say

" With [ThriveDX] Phishing Software we found the tool where we can compile an individual phishing attack within a few minutes and without much training time or effort. While preparing the campaign we got component support from the company so that our phishing simulations were a success. "
