

Deployment as a Service (DepaaS)

Extend your capabilities and your reach with Implementation and Configuration services from Exclusive Networks

Engineers, whenever and wherever you need them...

Whatever role we play within your project, our technical experts, acting as an extension of your solutions teams, will represent your business, deliver an exceptional customer experience, and help you to forge positive relationships through supporting your brand and your reputation.

Global Coverage, Local Service...

We understand the importance of operating within your culture and executing your vision. Our global pool of resources protect your reputation by delivering exceptional customer experiences supported by the right skills and, importantly, a great attitude.

What is the Exclusive Networks Deployment as a Service Experience?

Installation and configuration services provided remotely or on-site to support new or replacement solutions implemented to your design

Global coverage - multi-country, multi-site, multi-vendor projects are our specialty

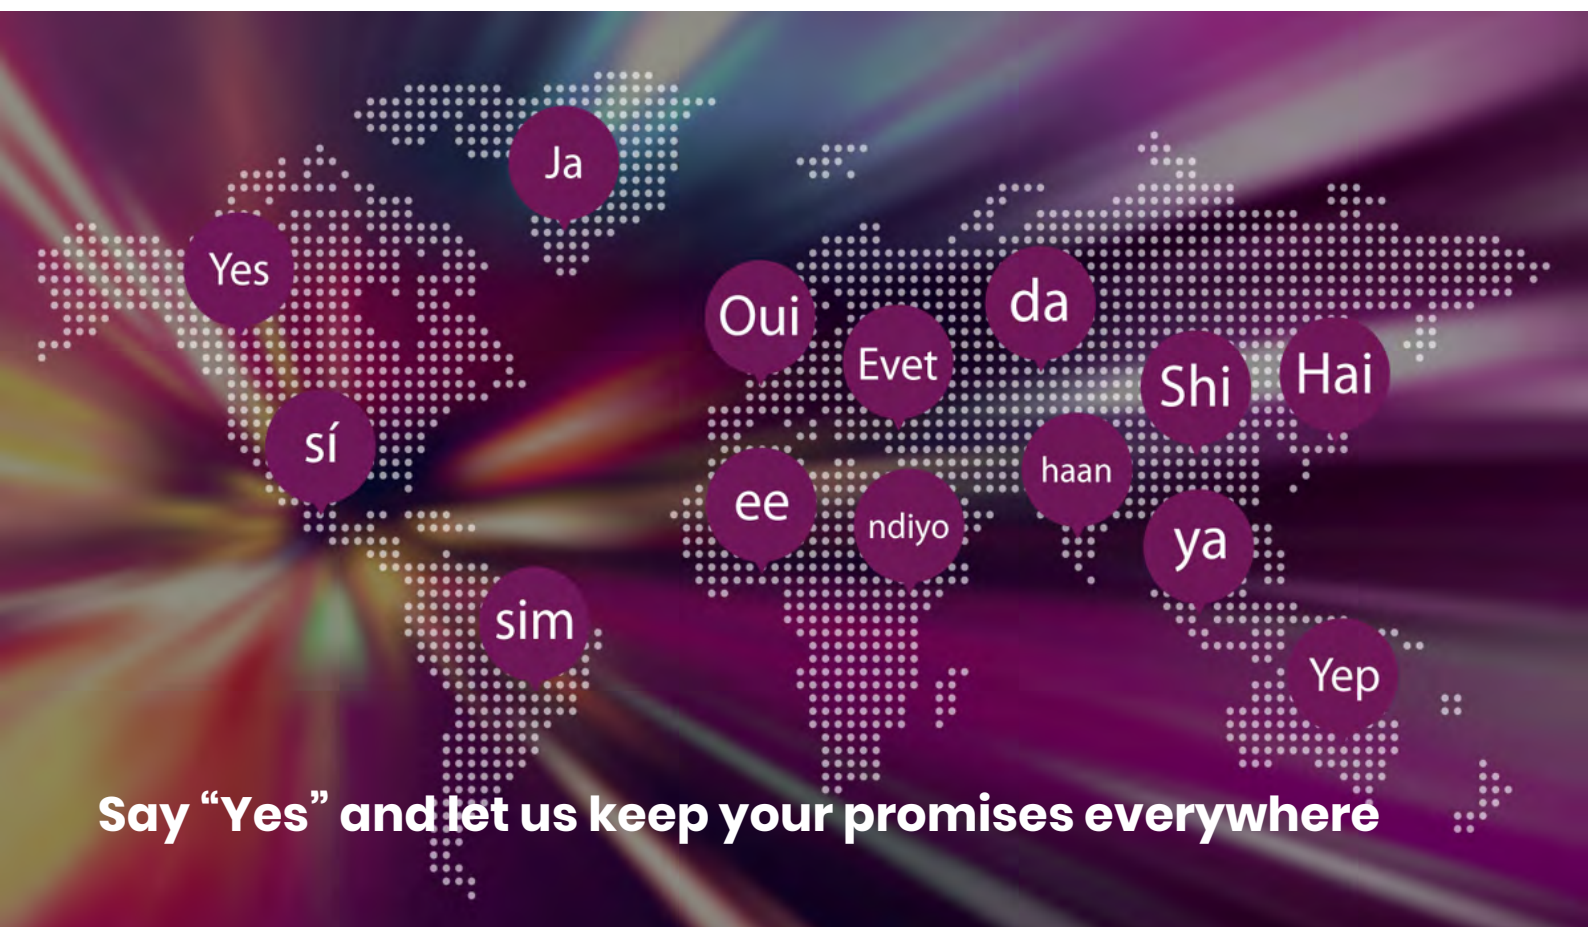

Orchestrated from a global project management office (PMO) operating PRINCE2 and Agile methodology to execute on time, on quality and on budget

Flexible services offered as a full end to end deployment experience, or to augment your own teams where local skills or coverage are your challenge

Global teams providing local services promote sustainability by reducing the requirement for international travel

Say “Yes” and let us keep your promises everywhere
