Threat Landscape Continues to Expand...

Gartner Predicts **10%** of Large Enterprises Will Have a Mature and Measurable Zero-Trust Program in Place by 2026.

Gartner press release January 23, 2023

Threat Landscape Continues to Expand...

IoT

Users

Operating System

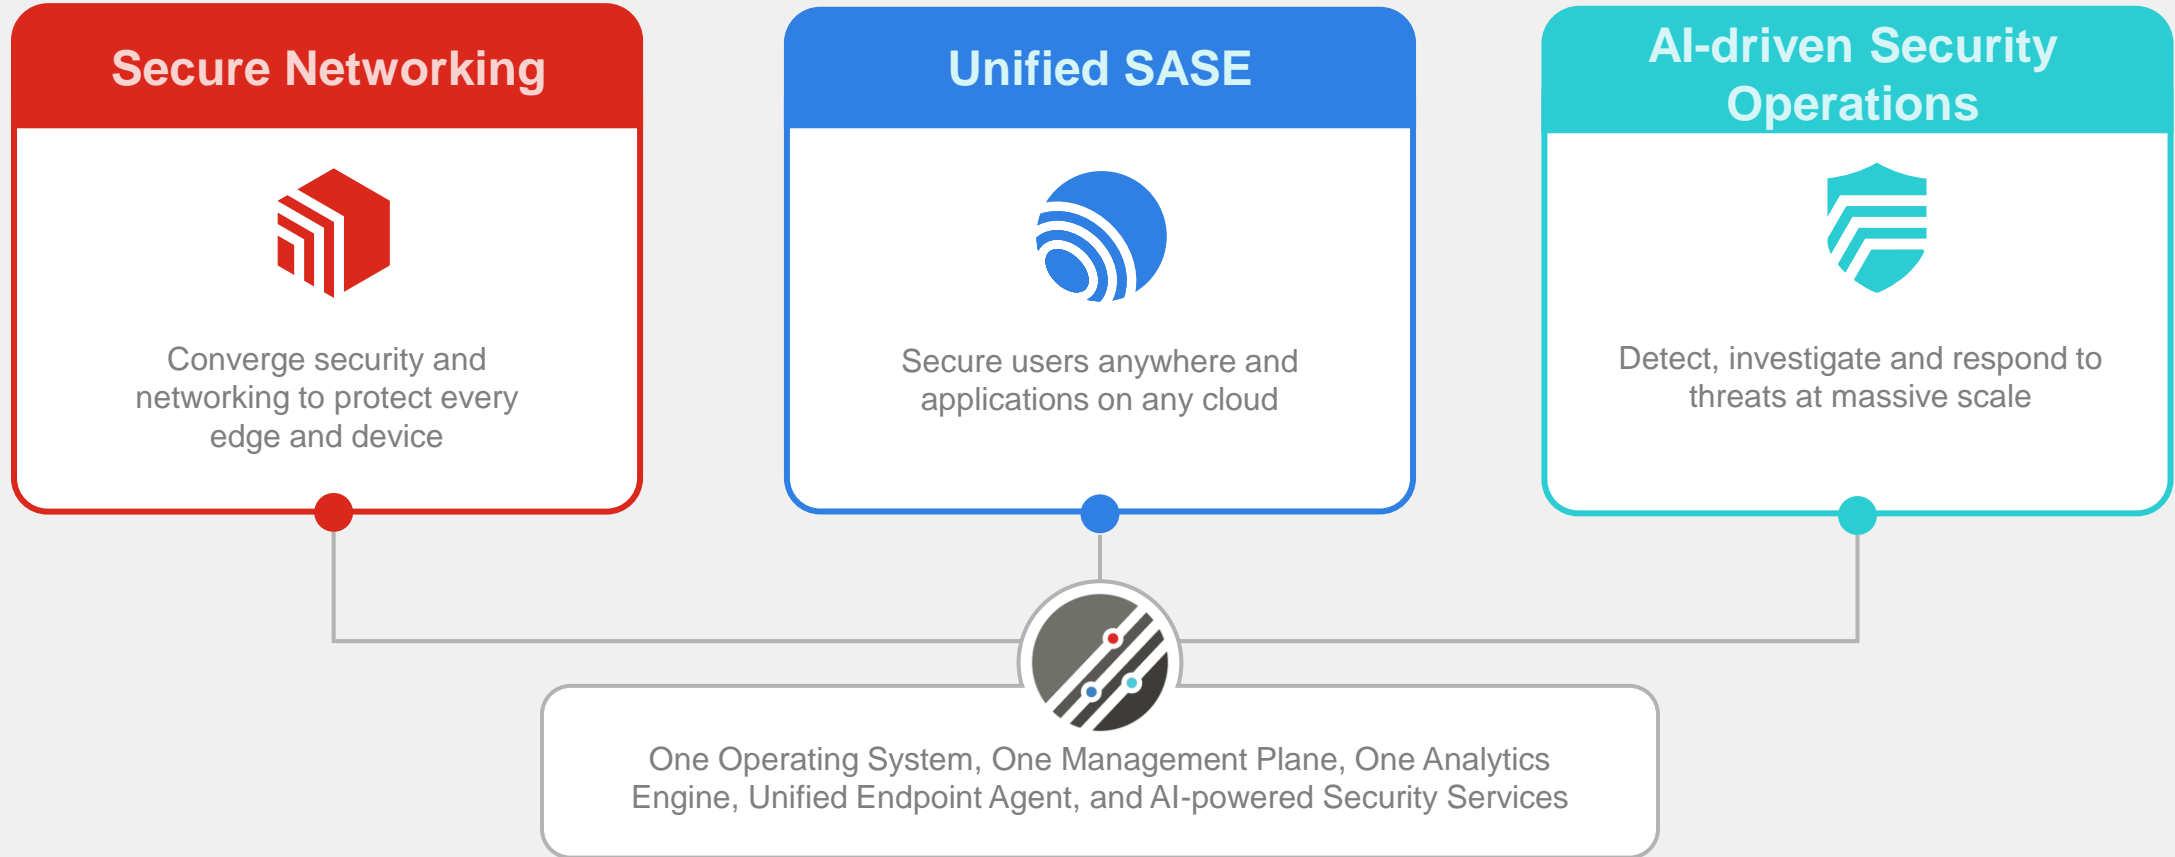

48% of respondents reported lack of time for proper risk assessment, and **39%** reported slowness to patch critical systems as a result.

Gartner press release January 23, 2023

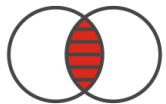

The Fortinet Security Fabric Vision

Cybersecurity, everywhere you need it.

Secure Connectivity

An aerial photograph of a crowd of people walking on a light-colored tiled plaza. The image is overlaid with various geometric elements: a red rectangle in the top left; a dotted grid in the top left; a purple rectangle in the top center; a red rectangle in the top right; a white semi-circle on the left containing the text 'Secure Connectivity'; a black line graph with an upward-pointing arrow in the top right; a red rectangle in the bottom center; a dotted grid in the bottom right; and a teal shape with a rounded corner in the bottom right. A small red logo is visible in the bottom left corner.

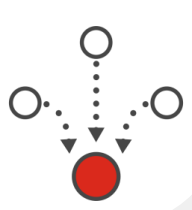

Convergence of Networking and Security

Enterprise Requirements

Convergence

High ROI & Low TCO

Secure SD-Branch

Securing and Simplifying Distributed Enterprise Through Convergence

SD-WAN secure business outcome driven WAN

- Simplifies traditional WAN complexity
- Better cloud application performance
- 5G/LTE Wireless WAN

Secure Connectivity protecting the access edge

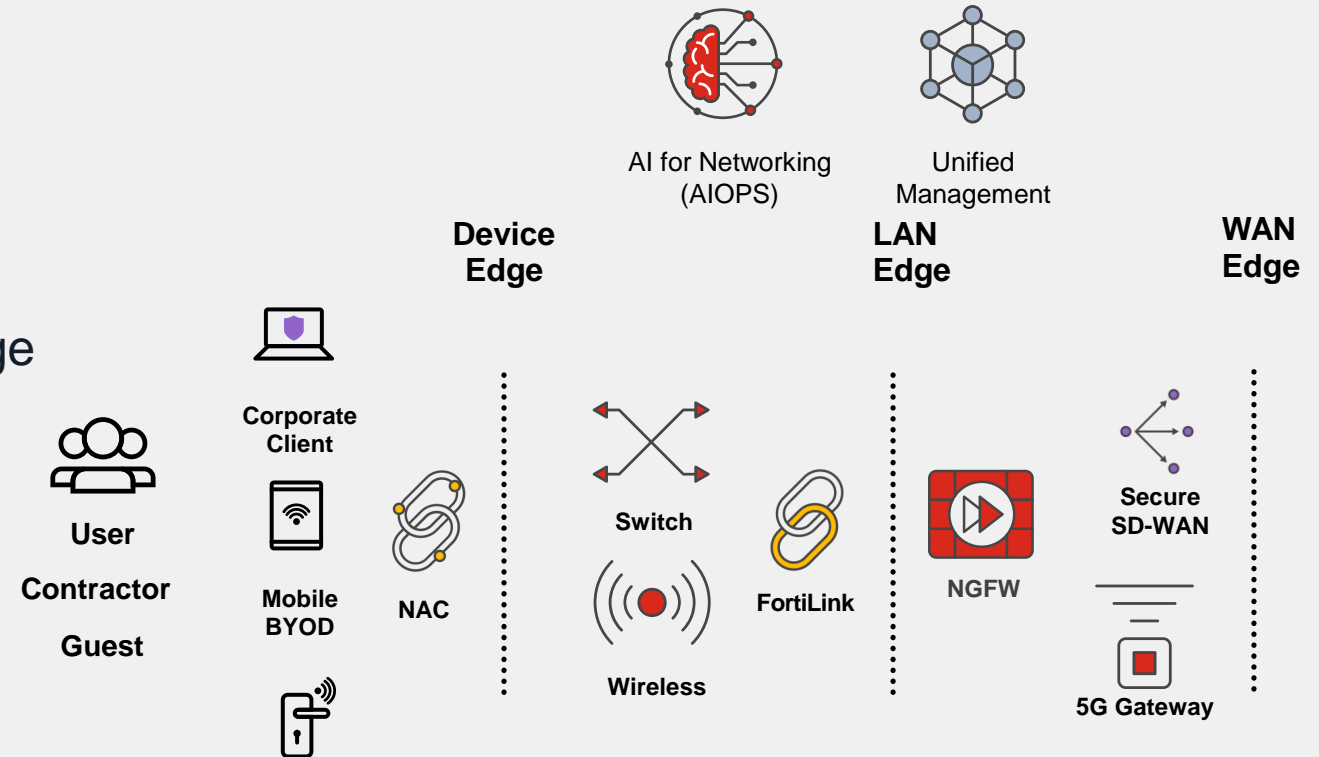

- Consolidation through convergence of security and network access

NAC protecting the device edge

- Discovery, classification, and secure onboarding of IoT devices

AI driven Management and Automation

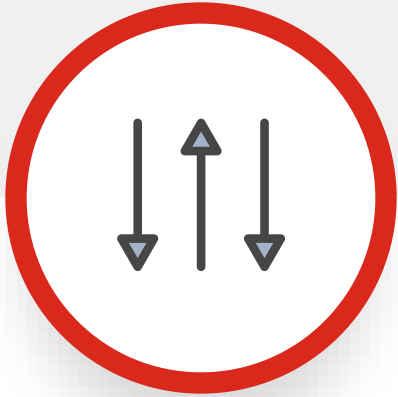

- Single pane of glass management
- AI for Network Operations

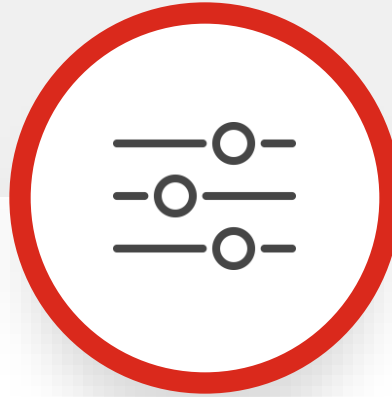

FortiLink

Direct control, configuration, and management through FortiOS

Configuration

- Agile deployment auto discovery

Control

- Extends the next-generation firewall (NGFW) features and inspection to the LAN

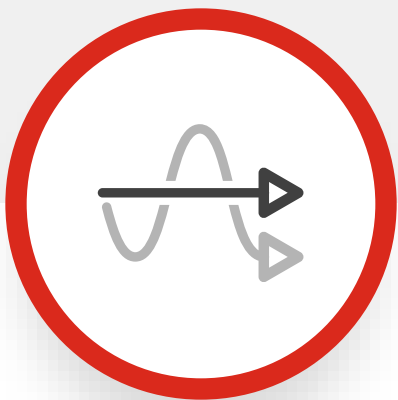

Management

- A significant step beyond centralized management
- Included with FortiOS, no additional licenses

FortiLink NAC

Secure onboarding of devices

Simplicity

- Easy deployment, no design changes, no overlay
- Defaults are ready to go

Visibility

- Automatic discovery of endpoints and devices
- FortiGuard IoT service available

Security

- Policy application
- Enable devices on port(s) or entire network
- Actions can be port or device specific

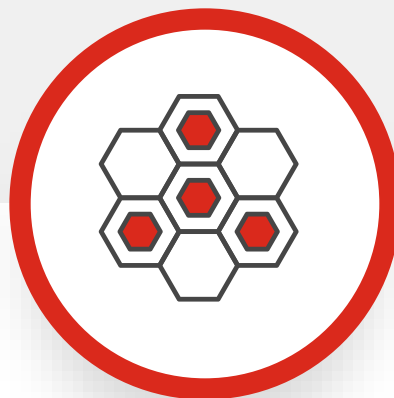

Virtual Patching

Isolate and Protect Vulnerable Devices

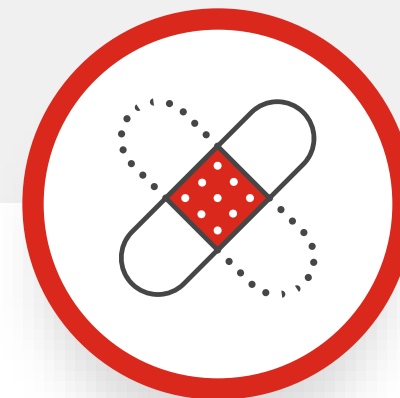

Identify Vulnerable

- FortiGate scans for vulnerable systems connected to the LAN
- Identifies unpatched vulnerabilities

Isolate

- FortiLink NAC isolates device into separate VLAN segment
- Dynamic policy assignment based on device vulnerability status

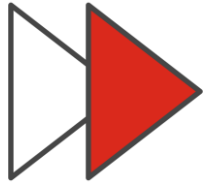

Virtual Patch

- IPS Virtual patching dynamically applied to protect device at port level.
- This patch prevents exploit of vulnerability

SD-Branch Product Components

FortiGate

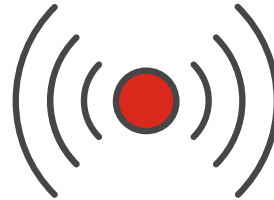

17+ models

Next Generation Firewall

WLAN Controller

Switch Controller

FortiAP

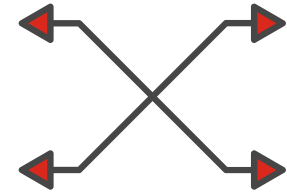

20+ models

- Wi-Fi 7
- Internal or external antenna

Indoor/Outdoor/Wall jack

FortiSwitch

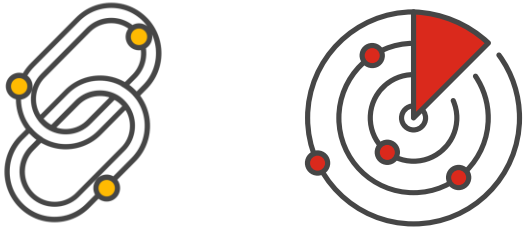

40+ models

- 1 GE to 100GE
- L2/L3
- Edge Switches
- Campus core & Data Center
- Rugged Options
- Advanced Services

SD-Branch Product Components

NAC

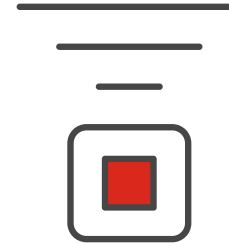

FortiLink NAC

- Base discovery onboarding and security

FortiNAC

- Advanced discovery and onboarding including multi-vendor support and anomaly detection

FortiExtender

- Up to Two radios
- Ethernet WAN port
- Routing capabilities
- Multiple LAN ports

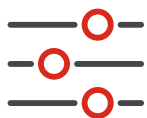

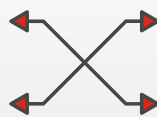

Zero Touch Deployment

Deploy

Ship Switches, APs and FortiGates to the site, plug it all in, and connect it to the internet

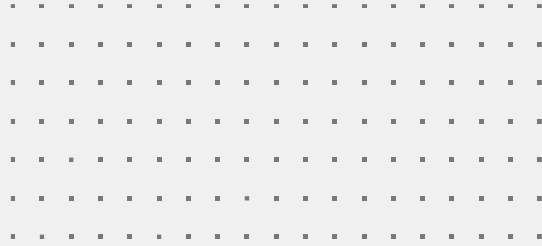

Configure

FortiDevice sends a message to our deployment server

Run

Deployment server pushes configuration to FortiGate, FortiSwitch and FortiAP

Hardware Models

FortiSwitch Updates

110G-FPOE

- 2x 5G/2.5/1G & 8x 2.5G/1G
- 90W 802.3bt PoE Capable
- 200W PoE Budget
- Uplinks (4) 10GE SFP+
- Fanless

600F Series

- 24x 5GE Multi-GE **or** 32x 2.5GE & 16x 5GE access
- 90W 802.3bt PoE capable
- Uplinks 8 x 25GE SFP28
- Dual AC Power supply
- Layer 3

2000F Series

- 48 x 25GE capable SFP28 slots
- 8 x 100GE QSFP28 Uplink slots
- 2 x 10GE SFP+ slots
- Dual hot swappable AC power supplies
- Layer 3

FortiSwitch Rugged Switch Family

100 Series

8x GE RJ45, 4x GE SFP slots
8x PoE/PoE+ RJ45 ports
Passive cooling, No fans or moving parts
Redundant power inputs
Built to IP30 standards

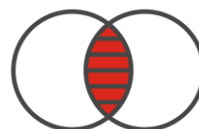

400 Series

24 Multi GE
12x 1/2.5 GE RJ45, 12x 1/2.5 GE SFP+
4x 10G SFP+, 2x 40G QSFP+
Fanless
12 802.3bt PoE (60W) ports
Built to IP40 standards

Business Value of Adopting Fortinet

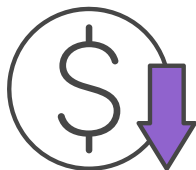

Convergence of network and security

- Breaks down silos centralizing data crucial for effective AI / ML

Simplified operations

- Single interface and operating system
- Centralized automation, orchestration

TCO benefits

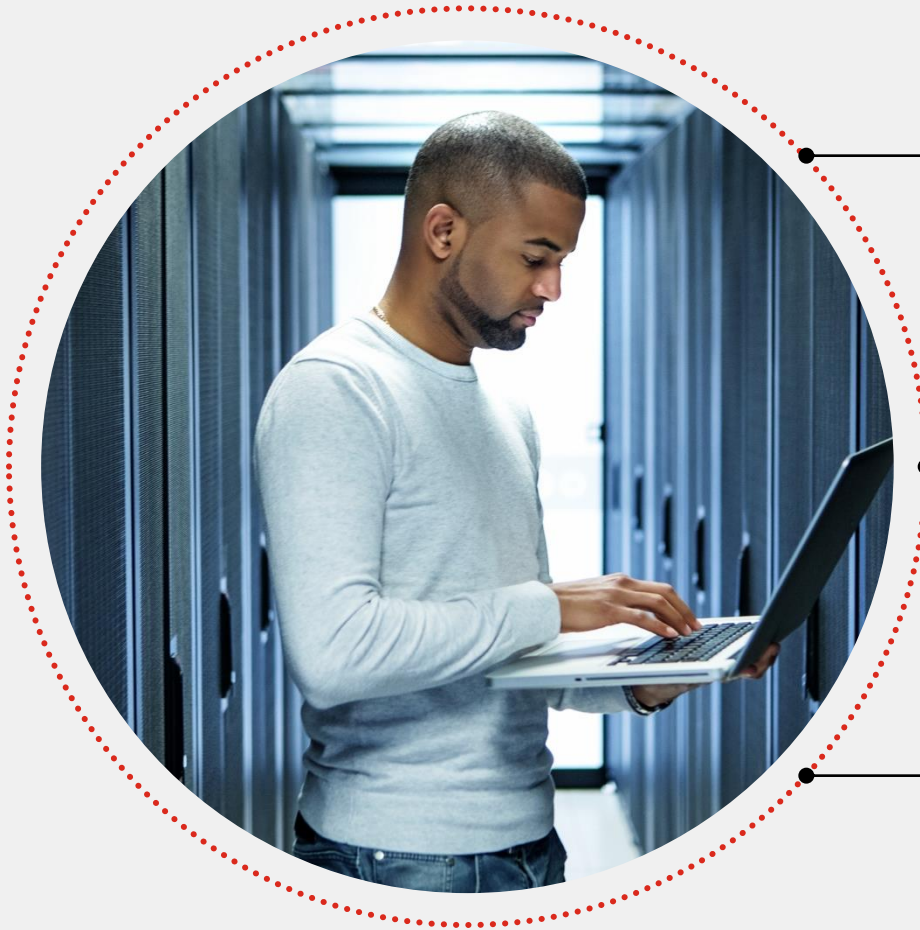

- Reduced management complexity
- Few licenses, more function, clear-cut value

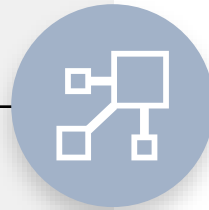

Delivering on Secure Connectivity Vision

A security-driven approach to networking through convergence

Secure

No other vendor offers tighter security integration

Easy

Single pane of glass to manage, automate, and orchestrate, security, wired, wireless and NAC

Intelligent

Native insights and recommendations for performance and resiliency. A rich data set for AI/ML to drive better outcomes and user experiences.

FORTINET®
