TRAINING HANDBOOK

INTRODUCTION

Exclusive Networks offers the highest standard of technical education on products and solutions in its portfolio. All courses are delivered by vendor accredited trainers with real world experience and practical insight, providing attendees with tangible capability as well as study book theory. Courses are designed to equip engineers with the skills needed to understand, configure, support, troubleshoot and manage products in their care. Knowledge transfer through the training programme helps both business partners and their customers become more effective in supporting/managing solutions. Exclusive Networks' high levels of accreditation and training credentials speak for themselves, through authorised training endorsements from the vendors in Exclusive Networks' product portfolio.

Exclusive Networks UK operates authorised training centres for:

Accredited training can be provided in accordance with the vendor courseware either from Exclusive Networks' training suites, at the customer's premises or a suitable location for all parties. Alternatively, bespoke training courses using selected material from the vendor courseware can be provided where necessary. Both accredited training and bespoke training include instructorled training and hands-on labs. Knowledge transfer sessions are also available which provide instruction and demonstration of customer selected topics.*

All of Exclusive Networks' trainers adopt a 'hands-on' approach, which means they teach course content with real-world practical experience, rather than simply facilitate how to achieve accreditation.

*Knowledge transfer sessions do not include courseware or hands-on labs.

COURSE NAME: FortiAnalyzer**DURATION:** 1 Day**PRODUCT VERSION:** FortiAnalyzer 6.0**DESCRIPTION**

The FortiAnalyzer course combines instructor-led training and interactive labs to build a solid understanding of how to integrate FortiAnalyzer into your network awareness infrastructure. It will provide working knowledge of setting up a FortiAnalyzer, registering supported devices and securing communications between the FortiAnalyzer and devices, managing logs and archiving, and configuring both predefined and customised reports.

Topics that are covered include key features and concepts of FortiAnalyzer, ADOMs, RAID, disk quotas, backing up and restoring log data, content archiving, SQL queries and datasets, designing datasets, charts and custom reports, and generating reports by schedule or on-demand.

TARGET AUDIENCE

The FortiAnalyzer course is intended for networking and security professionals who are involved in the day-to-day management of a FortiAnalyzer appliance and FortiGate security information. This includes network managers, and administrators, however installers, sales engineers, systems engineers, professional services engineers (presales and post sales) and technical support professionals can also benefit from this course.

PRE-REQUISITE(S)

- Familiarity with all topics presented in the FortiGate Security and FortiGate Infrastructure courses
- Knowledge of the SQL 'select' syntax is beneficial

CERTIFICATION

The FortiAnalyzer course combined with the FortiManager course are the recommended training to prepare for the NSE 5 certification exam to achieve **Network Security Expert** status.

COURSE OUTLINE**Day 1**

- Introduction and initial configuration
- Administration and Management
- Device Registration and Communication
- Logging
- Reporting
