

Introducing The Next Evolution Of Preventative Identity Security

TENABLE.AD IS NOW TENABLE IDENTITY EXPOSURE

Unify identities, measure exposure, prioritize remediation and eliminate risk across the modern identity attack surface.

Tenable Identity Exposure expands our real-time, preventative directory services security to **Azure Active Directory** and hybrid identities.

Continuously measure your identity exposure with **Identity Risk Score** powered by Tenable's AI and data science engine to help you prioritize remediation of your most critical points of exposure.

Eliminate blind spots and gain unparalleled visibility to cloud and on-premises identity risks in one comprehensive **Unified Identity View**.

Visualize and **eliminate attack paths** in Active Directory and Azure AD before they are exploited.

Leverage identity exposure intelligence within the **Tenable One platform** to gain identity aware cybersecurity risk awareness.
