

Introducing Nutanix Cloud Bundles

Grow and scale with confidence

We're big on cloud computing and we know businesses of all sizes are game, too. From heavy-hitting giants to SMEs and everything in between, we're seeing adoption on all fronts.

It's time to get Your Cloud, Your Way.

Wondering...HOW? Watch this!

Fast track to hybrid cloud

Start with bringing the cloud inside

of respondents described their cloud strategy approach as **hybrid**

Source: 2019 Forrester Adoption Profile: Public Cloud

85% says 50% of their workloads in public cloud are moving back **on-premises**

Source: Surviving and Thriving in a Multicloud World, An IDC Infobrief, sponsored by Nutanix - April 2019

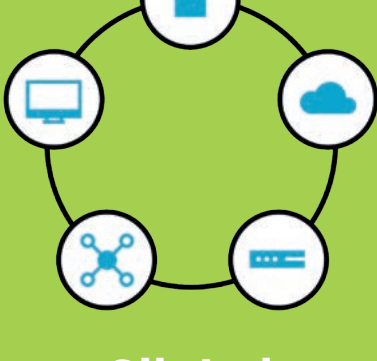

of global infrastructure decision-makers are investing in **private cloud**

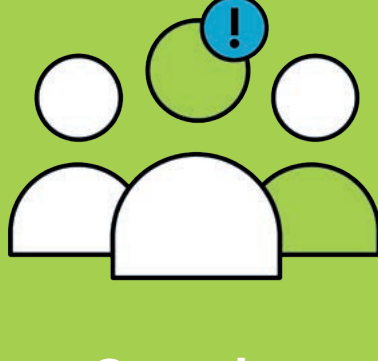

Source: Forrester Private Cloud Solutions Forecast 2018 to 2023

The fundamental barrier:

Inflexible architecture, legacy technology

Silo'ed

Complex

Expensive

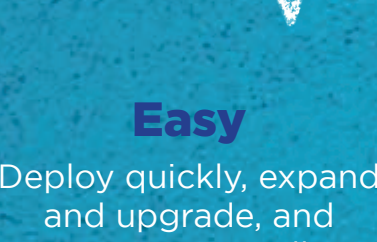

Software-based infrastructure

is the foundation that enables private cloud

The Nutanix solution for your cloud.

Your choice of hypervisor and hardware, no vendor lock-in.

ONE PLATFORM, ANY APP

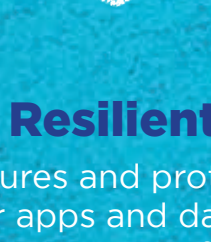

Easy

Deploy quickly, expand and upgrade, and manage centrally.

Intelligent

Automates day-to-day operations while you deliver critical services.

Resilient

Secures and protects your apps and data to give you peace of mind.

Works with

Hardware platforms:

NUTANIX

DELLEMC

Lenovo

FUJITSU

HITACHI

CISCO

Hewlett Packard Enterprise

inspur 浪潮信

IBM

NEC

intel

Virtualization & containers:

NUTANIX

Microsoft

vmware

Backed by a vendor obsessed with your success

Customer satisfaction

Proven and trusted by over 15,000 customers

We've got three cloud bundle levels to suit your needs and your budget

Easy as 1, 2, 3!

BASIC BUNDLE

Provides customers the ability to get started at a lower entry point, with the ability to add on additional capabilities in the future.

STANDARD BUNDLE

Comes with the tools you'll need to set up your first cluster(s), getting the benefits of Advanced Dedupe and Replication with AOS Pro, Capacity Planning with Prism Pro and support for unstructured data on bare-metal with Files.

ADVANCED BUNDLE

For customers that are especially sensitive to security and business continuity concerns, our Advanced Bundles level adds on Advanced Encryption, NearSync and MetroSync with AOS Ultimate, as well as micro-segmentation capabilities with Flow.

Wondering...which one? Take a look!

What customers are saying:

"Reduced server footprint by 40%."

"Decreased time to provision new storage and computing resources from weeks to hours."

"Obtained 25% lower TCO versus the traditional model."

"Deploy mission-critical apps, such as reservation systems and ticket counter apps, quickly, seamlessly without downtime."

"Reduced time to add capacity from months to hours."

"Eliminated additional virtualization costs and realized higher ROI."

"Reduced the IT turnaround time from weeks to hours."

"Reduced storage and compute footprint by 75%."

"Freed up IT ops resources to work on more important projects."
