

Start scaling your MSSP business

Why SentinelOne for your MSSP?

Companies nowadays struggle with stepping up to the next level to become MSSPs. High prices and rigid consumption models have made it almost impossible for small- and medium- sized businesses to get started. With the SentinelOne MSSP Programme on X-OD, partners can access MSSP technology through flexible consumption models and scale effortlessly.

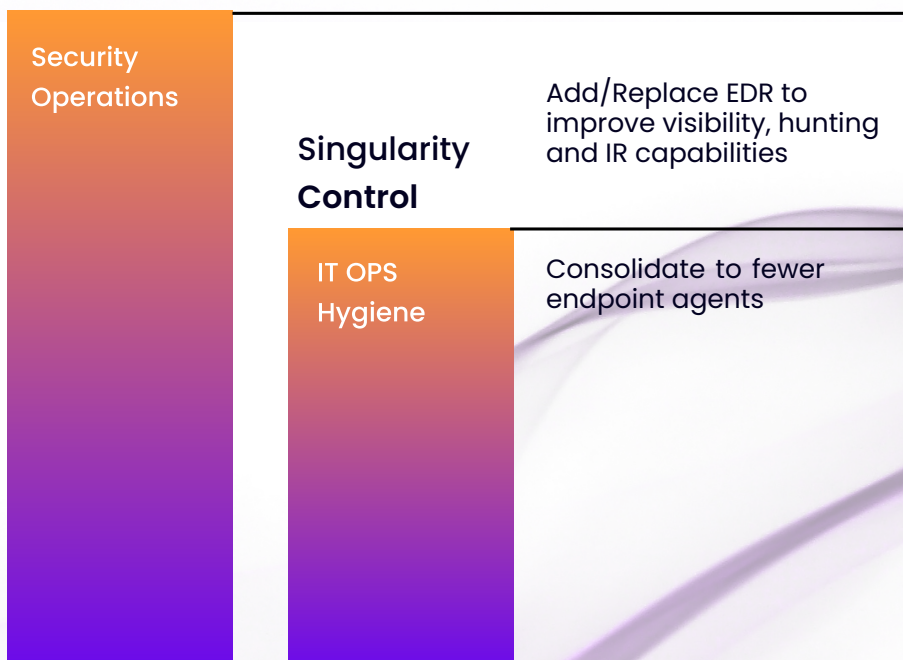

SOC and IT Operations are empowered thanks to the SentinelOne Singularity platform. It allows a more efficient way to protect information assets against today's sophisticated threats.

What is available through X-OD?

The SentinelOne portfolio through X-OD includes:

- Singularity Complete: made for enterprises that need modern endpoint protection and control plus advanced EDR features that called ActiveEDR™.
- Singularity Control: made for organizations seeking the best-of-breed security with the addition of “security suite” features for endpoint management.
