# XDR Overview

The Challenge: A single security event can raise huge amounts of questions

The Solution:

The XDR platform aims to solve the challenges for effective detection and response to targeted attacks. It creates an overview instead of taking a siloed approach. Including:

- Behavior analysis
- Behavior profiling
- Threat intelligence
- Analytics

What is XDR:

XDR is designed to help security teams:

- Identify sophisticated or hidden threats
- Track threats across any source or location within the organization
- Improve productivity of the analysts operating the technology
- Investigate threats more effectively and efficiently
