EXN TAC work to 4 levels of priority. Each of these will determine the SLA on initial response as well as our target follow up times for the duration of the support case.

<b>Priority 1</b> URGENT	Licensed software is down, in a failed state or is critically affecting customer's production environment.
<b>Priority 2</b> HIGH	Licensed software performance is significantly impaired, lacks resiliency or frequently interrupted. Production environment is up but impacted.
<b>Priority 3</b> MEDIUM	A Licensed software function has an error or minor performance issues. Production environment is degraded or not affected.
<b>Priority 4</b> LOW	General assistance that includes feature, information, documentation, how-to and enhancement requests.
