

# SentinelOne Singularity Signal

## Data-Driven Threat Intelligence

82% of organizations today employ cyber threat intelligence in their cybersecurity programs, but only 25% of teams believe their threat intelligence investments deliver against actual business objectives. Simultaneously, the volume of information sources and telemetry from which threat intelligence can be extracted has grown exponentially. Cyber threat intelligence (CTI) has become a data problem that humans alone can no longer solve.

### Singularity Signal

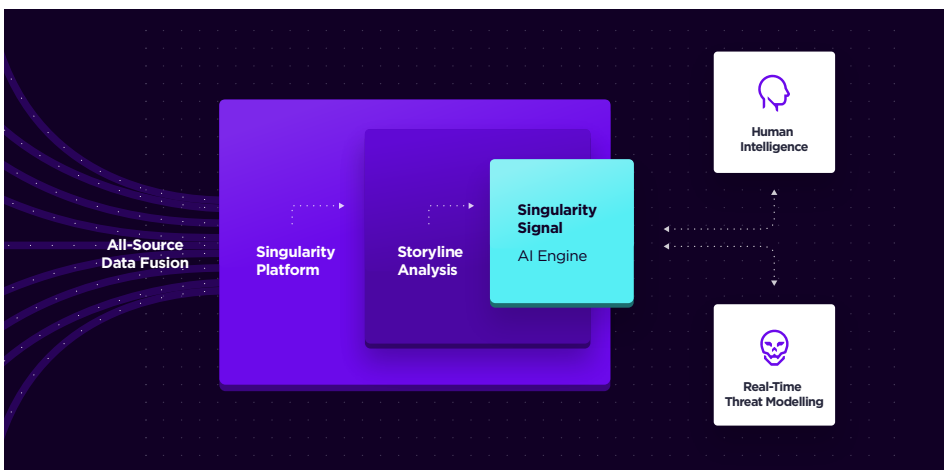

Singularity Signal is an open threat intelligence platform that combines artificial- and human-based intelligence to provide context, enrichment, and actionability to cyber data. This empowers you to stay a step ahead of adversaries with unparalleled insight into the attacker mindset.

With Singularity Signal, you gain a complete, tailored picture of how you're impacted by advanced persistent threats (APTs), nation-state groups, and emergent attacks such as zero-days through real-time enrichment of tactics, techniques, and procedures (TTPs), ongoing threat intelligence reporting curated by our experts, and easy integration of custom threat intelligence sources and data streams through the Singularity Marketplace and API. This helps you take a more proactive, informed approach to your defenses.

### Singularity Signal

#### Human Intelligence Powered by AI

The Singularity Signal AI engine collects and aggregates billions of signals across global Net-Flow data, C2 & Botnet cyber intelligence, honeypots, sinkholes, domain registration, DDNS, and more. Our dedicated research team further refines this intelligence by performing TTP correlation, enrichment of alerts with attribution, identification of previously unknown threats, and high-impact threat intelligence reporting.

### SOLUTION HIGHLIGHTS

#### Remove operational barriers to running a CTI program

Leverage the Signal AI engine paired with human intelligence to receive real-time insights on adversaries and predict their next moves.

#### Take a proactive approach to cyber threat defense

Understand the unique threat landscape faced by your organization and take steps to reduce your exposure before an attack occurs.

#### Seamlessly ingest data and integrate with solutions across your security stack

Ingest structured, unstructured, and semi-structured data on demand from any technology or platform, and get started with our Marketplace integrations in just a few clicks.

## Key Benefits

### 01 | Receive enriched intelligence through continuous, expert-level threat monitoring

Singularity Signal provides real-time TTP correlation to help SOC analysts understand who's targeting their environment, what has already occurred, and what may happen next.

### 02 | Gain proactive insights on global campaigns and adversaries

Singularity Signal delivers actionable guidance on threat actors, novel attacks, and zero-days through ongoing threat intelligence reporting, helping you take a more proactive approach to your defenses.

### 03 | Easily bring in 3rd party cyber data for a full ecosystem picture

Singularity Signal enables you to bring your own cyber data into the platform for real-time TTP correlation and global campaign analysis.

### 04 | Integrate with trusted threat analysis and enrichment tools in just a few clicks

The in-product Singularity Marketplace lets you integrate with popular threat intelligence data streams, intelligence synchronization services, and sandboxing solutions in a few short steps.

Fantastic experience from beginning to end

**Security and Risk Management Role**  
Energy & Utilities, 500M - 1B USD

Very proactive, supportive and professional team

**Infrastructure and Operations Role**  
Media Firm, 500M - 1B USD

Knowledgeable and highly responsive team

**Security and Risk Management Role**  
Healthcare, 1B - 3B USD

Very useful add-on service

**Security and Risk Management Role**  
Manufacturing, 1B - 3B USD

## Innovative. Trusted. Recognized.

A Leader in the 2021 Magic Quadrant for Endpoint Protection Platforms

Highest Ranked in all Critical Capabilities Report Use Cases

Record Breaking ATT&CK Evaluation

- No missed detections. 100% visibility
- Most Analytic Detections 2 years running
- Zero Delays. Zero Config Changes

98% of Gartner Peer Insights™

Voice of the Customer Reviewers recommend SentinelOne

### About SentinelOne

More Capability. Less Complexity. SentinelOne is pioneering the future of cybersecurity with autonomous, distributed endpoint intelligence aimed at simplifying the security stack without forgoing enterprise capabilities. Our technology is designed to scale people with automation and frictionless threat resolution. Are you ready?
