# VENDOR
OVERVIEW

DISRUPTIVE DISTRIBUTION

Accelerating market entry and growth for
innovative cybersecurity technologies

This is Exclusive Networks

Exclusive Networks is the 'go to' value-added distributor that accelerates market entry and growth for innovative cybersecurity networking and infrastructure technologies.

We call this 'Disruptive Distribution'. Here is an overview of the solutions we distribute through our best in breed vendors.

Key

Centralized Radio-Access Networks (C-RAN)	Network Response
Cloud Access Security Brokerage	Network Threat Detection
Data Loss Prevention	Network Visibility
Distributed Denial of Service	NG/UTM Firewall Platform
DNS Security	PIM (Product Information Management)
Email Protection	Privilege Access Management
Encryption	SD-WAN Security
Endpoint Protection	Secure Web Gateway
Endpoint Response	SIEM (Security Information and Event Management)
Fiber to the X (FTTx)	SSL Inspection
File Access and MDM	Threat Intelligence
Key Generation and Management	User Entity Behavior Analytics
Local Area Network (LAN)	Virtual Execution (Sandbox)
Mobile Security	Vulnerability Assessment and Patch Management
Network Packet Capture	Web Application Firewall
	Wireless

Bitglass

Bitglass is a leading CASB and provides a full complement of related services. Bitglass' hybrid CASB works through a combination of real-time controls via proxies and API-based controls for data-at-rest. Only a combined solution provides comprehensive coverage with real-time enforcement. Bitglass protects corporate data from the cloud to the device.

Cailabs

SHAPING THE LIGHT

Cailabs has mastered light shaping so that it can design, manufacture and sell innovative photonic products for telecommunications, free-space transmission, industrial lasers and local area networks (LANs). Their AROONA solution transforms the multimode optical fibers of the existing infrastructure into singlemode fibers, without replacing the fiber.

Fortinet

Fortinet's mission is to deliver the most innovative, highest performing network security platform to secure and simplify your IT infrastructure. They are a leading global provider of network security appliances for carriers, datacenters, enterprises and distributed offices. Fortinet's security fabric can intelligently protect your entire network; from the endpoint to the cloud and everywhere in between, delivering industry-leading, end-to-end simplified security that won't slow you down. Providing network security via industry leading solutions such as NGFW, Email, Web, Endpoint and Sandbox, Fortinet provides advanced threat protection and detection from even the most robust network attacks.

Infoblox

CONTROL YOUR NETWORK

Infoblox delivers Secure Cloud-Managed Network Services, bringing next level security, reliability and automation to cloud and hybrid systems, managed through a single pane of glass. Next Level Networking takes you to a world where network and security services are managed and consumed from the cloud while preserving your investments in on-prem systems maximizing the advantages the cloud can bring to your network today. Infoblox is pioneering digital transformation in core network services, including next-level DNS, DHCP, and IP address management (DDI) and DNS Security.

Nozomi Networks

Nozomi Networks is the leader in Industrial Control System (ICS) cyber security, with the most comprehensive platform to deliver real-time cyber security and operational visibility. Innovating the use of artificial intelligence, Nozomi Networks helps the largest industrial facilities around the world See and Secure™ their critical industrial control networks. Amid escalating threats targeting ICS, Nozomi Networks delivers one solution that provides customers with superior operational visibility and threat detection as well as easy IT/OT integration. Nozomi Networks supports over a quarter of a million devices in sectors such as critical infrastructure, energy, manufacturing, mining, transportation and utilities.

Rackmount.IT

Rackmount.IT was founded to develop, produce, and market rack mount accessories. One of the only manufacturers of FortiRack, Rackmount.IT produces a variety of Fortinet rack-mount models. Rackmount.IT is currently developing new models with active components, the first being the FortiDIN. New developments also include smart appliances that convert network appliances into remotley managed products.

SentinelOne

SentinelOne unifies prevention, detection, and response in a single platform driven by sophisticated machine learning and intelligent automation. It enables you to predict malicious behaviour across major threat vectors in real-time, rapidly eliminate threats with fully-automated, integrated response capabilities and adapt your defences against the most advanced cyber attacks.
