ON DEMAND PANEL DISCUSSION AGENDA [Duration 30 mins]

There's no better way to understand the benefits of Secrets Management than by watching our on demand panel discussion and seeing the technology in action. CipherTrust Secrets Management (CSM) is a state-of-the-art Secrets Management solution, powered by the Akeyless Vault Platform, which protects and automates access to secrets across DevOps tools and cloud workloads including secrets, credentials, certificates, API keys, and tokens.

SHORT DISCUSSION: THE GROWTH IN MACHINE TO MACHINE ACCESS AND SECRETS SPRAWL

Thales & Exclusive Networks

GET UP CLOSE WITH CIPHERTRUST SECRETS MANAGEMENT

An overview of platform capabilities including automatic processes for creating, storing, rotating, and removing secrets. Showcasing the ability to reduce the potential for human error and consistently enforce security policies across organisations with:

- **Centralised management for all secret types**
- **Easy to use, automated functionality for DevSecOps**
- **SaaS (Software as a Service) scalability for hybrid and multi cloud environments**

This recording is suitable for Sales, Marketing and Presales teams in our partner community.
